Waiting Rooms

Re-invented

At IDS, we turn ordinary waiting rooms into fun, welcoming environments filled with unique seating, video games and movie theaters. You can reduce anxiety in your patients by making them more comfortable the moment they walk in your door. Check out our website to see more dental office theming.

Help your patient relax!

ClearView™

SINGLE-USE NASAL MASKS

Choose Classic or Capnography

All our products are MADE IN THE U.S.A.

CROSSTEX
A CANTEL MEDICAL COMPANY

ACCUTRON™
Nitrous Oxide/Oxygen Sedation

Nitrous Oxide/Oxygen Sedation

The only nasal mask that actually demonstrates that your patient is breathing through their nose!

- Clear outer mask shows slight fogging when patient breathes properly through nose, and allows view of nasal/facial seal of the soft inner mask
- Low profile expands clinical field of view, provides easier access to patient's mouth, and keeps patient from making mask adjustments to see activities, operatory TV, etc.
- Appealing colors/scents delight and engage patients; unscented available
- Mask-in-mask design diminishes ambient nitrous oxide
- Single-use minimizes cross-contamination; saves staff time
- CO₂ Capnography version available to fulfill regulatory requirements
- Use with a variety of scavenging circuit brands

The best of **both** worlds in pediatric crowns.

BETTER QUALITY

BETTER DESIGN

For 30 years Cheng Crowns has been the most trusted name in pediatric crowns.

Our classic resin-veneered crowns, the industry's first aesthetic pediatric crown, are easy to place and last longer. And we continue to perfect our classic crowns, year after year.

Our all-ceramic zirconia crowns are unrivaled in aesthetics, using SmartPolish technology to give them a satin finish on the facial, and a mirror like quality on the lingual and margins.

We invite you to order a starter kit. If you're not totally satisfied, we'll give you a refund.*

Dr. Jade Miller
AAPD President

Welcome to AAPD 2017

It's a pleasure to invite you, your office staff and family to AAPD 2017 near Washington, D.C. All of the planning efforts have paid off and we're in a great position to have one of the best meetings ever. The scientific program takes place at the Gaylord National Resort and Convention Center allowing most of us to be all under one roof in a state-of-the-art facility located on the Potomac River. Additional hotels are conveniently located across the street at the National Harbor. Come celebrate the 70th Annual Session of the American Academy of Pediatric Dentistry!

FedExField? Anyone? Don't miss exclusive access to be on a NFL football field, in the locker room and throughout the stadium. The AAPD Welcome Reception has become the hallmark event in pediatric dentistry. From the bands, games, other entertainment and food, it's sure to be one of the best. I'd like to thank Sunstar Americas, Inc., for their continued support of the event.

The scientific program promises to deliver the cutting-edge topics you've come to expect at the Annual Session. The Preconference Course on Thursday, is Frenums to Pacifiers, Pearls for Treating Toddlers. The opening keynote features Mel Robbins, best known for her TEDx Talk on "How to Stop Screwing Yourself Over" and her book on the brain and productivity, "Stop Saying You're Fine," is a business bestseller.

The celebration at the Presidents' Farewell Dinner promises to be an amazing affair at the Smithsonian National Museum of Natural History! Be sure to make plans to stay for this wonderful event at the most-visited museum in North America!

Make the most of your visit at National Harbor by exploring the multitude of shops and restaurants, or take in a movie in the harbor at the plaza. Want to go into D.C.? Take a water taxi to the National Mall, Alexandria or the Nationals Stadium. A shuttle at the Harbor is available to take guests to the Tanger Outlet Malls or the new MGM Resort and Casino. Fun is sure to be had by all who attend!

I would like to personally thank the local arrangements: Shari Kohn, Mitali Patel and Anu Tate. Their work to make this a spectacular event is appreciated by me, and will be noticed by everyone.

See you in D.C.!

Drs. Shari Kohn and Mitali Patel
AAPD 2017 Local Arrangements Co-Chairs

Welcome to Washington, D.C.!

Welcome to AAPD 2017 near Washington, D.C.! Washington is a dynamic city known for not only its rich history and monuments but also its growing restaurant scene and beautiful location right on the Potomac River.

This year, we will all fit under one roof at the Gaylord National Hotel and Convention Center located right on the banks of the Potomac River, footsteps away from the Capital Waterfront. The National Harbor is home to the Capital Wheel, which takes you 180 feet high with breathtaking views of the Capitol, White House and the National Mall. Take a boat ride down the Potomac River, getting a close-up view of the monuments including the Washington Monument, Lincoln Memorial and Jefferson Memorial. Shuttles will be available to visit the National Mall and experience the history of our wonderful city.

On behalf of the American Academy of Pediatric Dentistry and the Local Arrangements Committee, we are honored to be your hosts for an exciting and educational 70th Annual Session. The Scientific Program Committee has worked diligently to develop a program that incorporates local talent from some of the leading medical and dental practitioners and researchers in the country. As always, there will be a strong educational balance encompassing pulp therapy, caries management, orthodontics to practice management, staff enrichment and outliers we see but don't often discuss, such as; abuse, neglect, street drugs and overdose. We guarantee that there is something for everyone.

We wanted to thank Dr. John Rutkauskas, and the AAPD staff of Tonya Almond, Kristi Casale, Jessica Parra and Colleen Bingle for helping design great events throughout the city. If you have not been to Washington, D.C., or if you are returning, you and your family are guaranteed an excellent experience! Mark your calendars now and join us at the AAPD Annual Session in Washington, D.C., May 25 – 28, 2017.

General Information

Conference Harvester Audio Recording

Make the most of your educational experience at the AAPD 2017 and be sure to purchase the “Key” to access the conference audio proceedings. The Premium level gives you online and app access to the slides synchronized to audio from the Scientific Sessions, Mini-Clinics, and String of Pearls. With so many quality sessions to choose from, having the other sessions at your fingertips is priceless. This multimedia product (viewable on any computer and smart device) is an excellent training tool and informational resource. In addition, the content will be available to watch or download for five years after the event. Purchase eventScribe Audio Proceedings as part of your registration for just \$189 when you register for the conference. Post-conference cost is \$229.

To order, see page 37 of the registration form.

ADA

AAPD conferences are ADA compliant. We strive to take the appropriate steps required to ensure that no individual with a disability is excluded, denied services, segregated or otherwise treated differently. Individuals requiring special assistance must make the appropriate notation on the registration form and/or contact the AAPD Meeting Services Department. All requests for special accommodations under ADA must be made allowing enough time for evaluation and appropriate action by AAPD.

Attire

The Scientific Program is business casual. We recommend you have a sweater or light jacket available in case you find the meeting rooms too cold. The Welcome Reception is casual; come dressed in your favorite NFL team gear! The Presidents’ Farewell Dinner is cocktail attire.

Conference App

Attention all smart phone users and tablet owners! The AAPD continues to provide a comprehensive conference app for AAPD 2017 to keep you engaged before, during and after the meeting. The event app includes a complete list of sessions, speakers, exhibitors, local attractions, facility maps and much more!

Sponsored by NuSmile

The conference app, Online Itinerary Planner, interactive floor plan and the ePoster Gallery are linked. Create an account, login and mark your favorite exhibitors or sessions...when you login to the app, it will all be there! Once AAPD receives the speaker handouts, they will all be included in the app and the Online Itinerary Planner providing you a comprehensive educational tool both online and in your hands.

Again in 2017, we are providing a dedicated Poster App which includes full color posters as well as the abstract allowing you to sort by topic, track, day and presenter. Check out this opportunity to see this important research!

ePoster Gallery and Posters AllSponsored by Pacific Dental Services, Inc.

Continuing Education Credit

The AAPD is an ADA CERP Recognized Provider. Credit is awarded on an hour-for-hour basis. Attendees should claim only those hours of credit that they actually spent in the educational activity.

ADA CERP is a service of the American Dental Association to assist dental professionals in identifying quality providers of continuing dental education. ADA CERP does not approve or endorse individual courses or instructors, nor does it imply acceptance of credit hours by boards of dentistry.

Photography/Video Waiver

AAPD plans to take photographs and/or video at AAPD 2017 and reproduce them in AAPD educational, news or promotional material, whether in print, electronic or other media, including the AAPD website. By participating AAPD 2017, you grant AAPD the right to use your name, image and biography for such purposes. All postings become the property of AAPD. Postings may be displayed, distributed or used by AAPD for any purpose.

Scientific Proceedings

The Academy provides the Scientific Proceedings in advance of the Annual Session electronically. Everyone registered by Monday, May 1, 2017, will receive an email with a link to the handouts in advance allowing you to print the handouts you want to bring with you or to download them to a tablet or computer. Handouts provided by the speakers are also included in the comprehensive conference app.

Travel Information

Airline Discounts

AAPD offers discounted meeting fares on various major air carriers for AAPD meeting attendees. To receive these discounts, please contact Direct Travel, AAPD's official travel provider at 800.840.0908. As always, to obtain the lowest available fares, early booking is recommended.

Getting There

Gaylord National is just a 15 minute drive from Reagan National Airport and a 45 minute drive from both Dulles and Baltimore Washington International Airports. Shuttle and car service are available from either airport to the hotel; Hertz is a Gaylord Hotels preferred partner for car rentals. Taxis are available from Reagan National Airport and range from \$35—\$45 depending on the time of day.

Exhibit Hall

Maximize your time at the Annual Session and visit the exhibit hall to explore products and services geared toward you and your pediatric dental office. Visit the combined AAPD Exhibit Booth which includes the AAPD Store to pick up a copy of the Coding Manual, the new Pediatric Dentistry Handbook or a souvenir from this year's Annual Session! Spend some time in the Healthy Smiles, Healthy Children Donor Lounge to learn more about the Access to Care Grants or simply to make a donation or increase your current pledge to the Foundation.

The exhibit hall schedule is created to maximize your time with the exhibitors while still providing time to attend the education courses you want and enjoy the city! The Hospitality Area is located on the exhibit hall floor offering a continental breakfast, complimentary beverages each morning and afternoon. Lunch is available for purchase on Friday and Saturday.

Visit the AAPD Store to see what prizes you are eligible to win in the exhibitor drawing. Be sure to check out the My Kid's Dentist Research Poster Competition and the Smiles for Life Network Tech Hub!

Raffle in Exhibit Hall

Feeling lucky? The AAPD is hosting a raffle for all attendees! Take the raffle card found near registration and visit with 20 exhibitors and get a stamp. Once you've filled out your raffle card, bring it to the AAPD Store in Booth 623. The raffle takes place in the AAPD Store on Sunday, May 28, at 11 a.m.

The Tech Bar

Gadgets & BYOD

Learning can be fun, so come to play!

Cool gadgets will be on hand including virtual reality goggles, smart watches, infrared keyboards, and more. The future of tech is here—and so much of it is wearable. Come check it out.

BYOD! Often your biggest obstacles are with the devices you already own, so bring your own device for in-hands tips and solutions you didn't know were possible. Ask the toughest tech or app questions, and walk away much more efficient.

Sponsored by Smiles for Life

Sponsorship Opportunities

Wondering what kind of exposure your company can get at the AAPD Annual Session? Look no further. There are various opportunities still available to target your company's goals and meet your budget!

For more information on becoming a sponsor for the AAPD, please visit <http://www.aapd.org/2017/exhibits.asp> or contact Meetings and Education Manager Jessica Parra at jparra@aapd.org or (312) 337-2169.

Scientific Program Codes

The following code letters appear after those programs and presentations that the Scientific Program Committee suggests would be of special interest to that particular group of attendees. However, sessions are open to all participants.

PD: Pediatric Dentist
DT: Dental Team
S: Spouse

Joint Academic Day

Thursday, May 25

8 AM – 5 PM

(Invitation only)

Join your colleagues for the annual Joint Academic Day. Invited speakers for the morning session focusing on GME funding and Title VII include Capt. Renée W. Joskow, D.D.S., M.P.H.; Senior Dental Advisor, Health Resources and Services Administration Shane Rogers; Chief, Oral Health Branch, Division of Medicine and Dentistry, Bureau of Health Workforce, HRSA; Thomas Vallin, M.P.H., Project Officer, Oral Health Training Branch; and Susan Banks, J.D., Counsel with Dentons in their health care practice area.

In the afternoon, the Society of Predoctoral Program Directors and the Society of Postdoctoral Program Directors will hold discussions on issues relevant to predoctoral and postdoctoral topics of interest.

For further information, please contact Educational Affairs Manager Scott Dalhouse at (312) 337-2169 or sdalhouse@aapd.org.

With the AAPD's successful messaging on the Age 1 Dental Home, pediatric dentists are confronting issues of toddler dental care daily; in fact it takes up a major portion of the pediatric dentist's morning office hours. Providing oral health care to this cohort requires a special knowledge of diagnostic factors and treatment techniques not inherent in the treatment of the rest of our patients.

Learning Objectives

- Review the clinical importance of growth and development in the comprehensive evaluation of the infant and toddler
- Provide evidence-based guidelines on the management of ankyloglossia and the maxillary frenum as they relate to breast feeding and oral development
- Explore the importance of the developing airway and tongue posture in the growth and development of the oro-facial complex
- Understand how non-nutritive sucking habits can affect oral development and occlusal disharmony
- Learn how to identify and manage developing malocclusions in the primary dentition

Opening Ceremony & Keynote Address

Mel Robbins

Friday, May 26

7:30 – 9 AM

Meet Mel Robbins. Mel is a third generation entrepreneur, a married mother of three, and here's a fun fact – she used to be a public defender representing violent felons in New York City.

She's no longer arguing reasonable doubt to a jury; she's teaching people around the world about the power of learning to push ourselves and how to break our habit of self-doubt.

You may have seen Mel's TedX Talk "How To Stop Screwing Yourself Over," which has racked up over 10M views across social channels in 37 countries, and is climbing by the hour. Perhaps you've seen her on TV, she's one of CNN's senior legal and social commentators. Or on the pages of *SUCCESS Magazine*, where she is a contributing leadership editor.

100. Speech and Language in a Developing Child

Friday, May 26

9:30 AM – 12:30 PM

Gajanan Kulkarni, B.D.S., M.Sc., Ph.D., F.R.C.D.; Paula Klaiman, M.C.I.Sc., C.A.G.S.; Tim Bressman, Ph.D.

KULKARNI

KLAIMAN

BRESSMAN

The presentation explores the interaction of pediatric dentistry and Speech Language Pathology (SLP) with an attempt to clarify the confusing picture of speech disorders from the pediatric dental perspective and decode some of the speech-language specific terminology. A discussion of common dental malocclusions and interventions for their correction on speech will be discussed. The responsibilities of a pediatric dentist with regards to speech disorders, behavioral rules and aids for interacting with, and counseling,

children with speech disorders will be presented. How to interact with and work cooperatively with speech language pathologists in the interest of mutual patients/clients will be discussed.

The session will also outline the normal development of language and speech. Particular emphasis will be placed on the different subsystems of speech production and the associated anatomy. Methods for the assessment of speech production will be described.

Gajanan Kulkarni is a tenured associate professor of dentistry at the University of Toronto since 1998. He is a diplomate of the American Board of Pediatric Dentistry and a fellow of the Royal College of Dentists of Canada. With over 150 publications and presentations, he is a regular presenter at the AAPD and IAPD meetings.

Paula Klaiman began her career at SickKids in 1985. She is the senior Speech-Language Pathologist on the Cleft Lip/Palate, Craniofacial and 22q Deletion Syndrome teams and an assistant professor in the Graduate Department of Speech-Language Pathology at the University of Toronto. She has taught courses to Speech-Language Pathology, dental and medical students. Klaiman has lectured extensively on the assessment and treatment of communication disorders in children with cleft palate and craniofacial conditions. Her main research focus is on clinical outcomes following surgery for Velopharyngeal Dysfunction. Klaiman has published numerous articles and several book chapters related to her area of expertise.

Tim Bressmann is an associate professor in the Department of Speech-Language Pathology at the University of Toronto. He studied Clinical Linguistics at the Universities of Freiburg and Bielefeld as well as Trinity College Dublin. He completed his Ph.D. in Phonetics at the University of Munich while working as a researcher in the Department of Oral and Maxillofacial Surgery at the University of Technology in Munich. Bressmann's main research interests are speech disorders associated with cleft palate and head and neck cancer. He has authored over 80 journal articles, book chapters and peer-reviewed conference proceedings.

110. Orange is the New Black: Coping with Medicaid and HIPAA Audits

PD
DT

Friday, May 26

9:30 AM - 12:30 PM

Jessica Meeske, D.D.S., M.S.; Margaret Surowka Rossi, B.A., J.D.A.; Paula Tironi, J.D. L.L.M.; Lynn Mouden, D.D.S., M.P.H.

MEESKE

ROSSI

TIRONI

MOUDEN

Hearing the term government audit is sufficient to strike fear in the heart of any practicing pediatric dentist. However, it is important to understand the basis for and scope of government auditing authority in two critical areas: dental insurance for children of low-income families (Medicaid) and patient privacy (the Health Insurance Portability and Accountability Act of 1996, known as HIPAA). Legal and government experts will examine the legal and regulatory framework within the Medicaid and HIPAA laws and steps that a pediatric dental practice should take to ensure compliance with these laws. This presentation will discuss various types of audits, the auditing process, and steps a provider should take during an audit. Finally, recommendations will be made for obtaining a positive audit outcome.

Jessica Meeske practices in south central Nebraska where she is a partner with Pediatric Dental Specialists of Greater Nebraska. Meeske is a graduate of Hastings College and the University of Missouri-K.C. College of Dentistry. She completed further training in pediatrics and public health at the University of Iowa, College of Dentistry's, Leadership in Pediatric Dentistry and Dental Public Health Program where she received her master's in dental public health. Meeske is board certified by the American Board of Pediatric Dentistry. She serves on the AAPD board of trustees.

Margaret Surowka Rossi has more than 20 years of experience as a strong advocate for her health care clients, representing individual providers and facilities in licensure, disciplinary and ethics proceedings. She routinely counsels clients who are faced with Medicaid, Medicare and other governmental investigations and audits, as well as on employment and contract matters. Rossi defends individual health care providers facing license revocation and represents them in disciplinary matters before the Office of Professional Medical Conduct and the Office of Professional Discipline. She also represents employers from other industries in matters before the State Division of Human Rights. Rossi's familiarity with New York State and city lobbying laws helps her navigate clients' lobbying compliance issues and audits. Rossi brings an insider's perspective to her practice from her previous position as sole in-house

counsel to the 14,000 member New York State Dental Association. In this capacity, Rossi counseled members regarding compliance, proposed legislation and regulations, developed a HIPAA guide for members, provided risk management seminars, and analyzed and guided members on all health care related matters.

Paula Tironi is a senior associate general counsel in the American Dental Association Division of Legal Affairs. She concentrates on health law and data security issues, including HIPAA and federal health care regulations, and serves as an attorney liaison to the ADA Council on Scientific Affairs, the Commission on Continuing Education Provider Recognition, and the Strategic Planning Committee. Paula previously worked as Corporate Legal Counsel to manufacturing corporation Armstrong International, Inc.

Lynn Mouden is an internationally recognized author and lecturer on the clinical and legal aspects of family violence prevention and oral health advocacy. He earned his undergraduate degree from the University of Kansas; his D.D.S., with distinction, from the University of Missouri at Kansas City; and his Masters in Public Health from the University of North Carolina. After 16 years of private practice, eight years with the Missouri Department of Health, and 12 years with the Arkansas Department of Health, he now serves as the Chief Dental Officer for the Federal Centers for Medicare and Medicaid Services (CMS). He also holds faculty appointments at the UMKC School of Dentistry, the University of Tennessee College of Dentistry, and three faculty appointments at the University of Arkansas for Medical Sciences (UAMS) in the Colleges of Medicine, Public Health and Health Related Professions.

MCTIGUE

SUBRAMANIAN

This presentation focuses on diagnostic dilemmas in pulpally-involved permanent teeth. The latest in translational research and cutting-edge treatment modalities for vital and non-vital teeth, including regenerative endodontics, will be discussed. Many

clinical cases will be presented providing useful clinical tips and treatment options that clinicians can adopt into their practices. Attention will be given to the management of complex cases shared by specialists in endodontics and pediatric dentistry.

Dennis McTigue is Professor Emeritus of Pediatric Dentistry at the Ohio State University. He is past-president of the AAPD, the American Board of Pediatric Dentistry and of the Academy of Dentistry for the Handicapped. He maintained a private practice in pediatric dentistry for over 35 years. His research and clinical interests include dental traumatology and children's behavior in the dental office.

Kumar Subramanian is an endodontist in private practice and also is actively involved in teaching the residents at Nationwide Children's Hospital, Columbus, Ohio. He is involved in organized dentistry, access to care and serves as a member of the Ohio State Dental Board. His main research focus is on traumatic dental injuries and cytokine biomarkers to predict healing patterns. He has published many articles in peer reviewed journals and has been an invited speaker in multiple local, national and international meetings.

130. Dealing with Difficult Patients, How to Turn Lemons into Lemonade

Friday, May 26

9:30 AM – 12:30 PM

Lois Banta

BANTA

Patients can become difficult during any part of their appointment. Together we will embark on a journey to identify the people and situations which create the most stressful part of a dental practice, the difficult patient. We will learn specific communication skills to prevent these challenges from escalating into the most impossible scenarios—it starts with the team and ends with the team!

Lois Banta is CEO, president and founder of Banta Consulting, Inc., a company that specializes in all aspects of dental practice management. Banta has almost 40 years of dental experience and consults and speaks nationally and internationally. She is the owner and CEO of The Speaking Consulting Network, and a member of Academy of Dental Management Consultants, National Speakers Association and American Academy of Dental Practice Administration.

140. Sedation: What's New? Local Anesthesia Review and What's New

Friday, May 26

1:30 – 4:30 PM

Elliot Hersh, D.M.D., M.S., Ph.D.; Mana Saraghi, D.D.S.

HERSH

SARAGHI

Local anesthetics and their associated vasoconstrictors have had a long history of safety and efficacy in dental practice. However, pediatric dental patients are especially vulnerable to overdose reactions with this group of drugs, and it is critical

that the clinician does not exceed maximum recommended dosages of these agents. These important dosage calculations and an introduction to "The Rule of 25" will be discussed. Kovanzaze, an intranasal spray formulation of three percent tetracaine

plus 0.05 percent oxymetazoline received FDA approval on June 29, 2016, to provide maxillary anesthesia for a single restorative procedure from 2nd premolar to 2nd premolar, and in all primary teeth without the need for a conventional injection in patients weighing at least 88 pounds. This appears to be a useful addition to the pediatric dentist's local anesthesia armamentarium in fearful children, and evidence-based research performed by the speaker and others supporting the efficacy and safety of this formulation will be highlighted. Finally, evidence-based research concerning the ability of Oraverse (phentolamine mesylate) to safely accelerate the recovery of soft tissue numbness in adults and children as young as three years of age will also be presented.

It comes as no surprise to the pediatric dentist that sedation-related morbidity and mortality is a frequent topic of discussion in today's media. Regardless, it is of the utmost importance to identify high risk patients and ensure an adequate emergency armamentarium is in the office. In the wake of such events, state boards may opt to increase monitoring requirements as well. This lecture will review ADA and AAPD Guidelines, including end-tidal capnography; novel oxygen and nitrous oxide delivery systems; and emergency armamentarium, including reversal agent dosing and EpiPen® auto injector alternatives.

Elliot Hersh is currently a professor of Pharmacology/ Oral Surgery at the University of Pennsylvania School of Dental Medicine. He received his D.M.D. degree from UMDNJ-NJDS in 1981 and his M.S. and Ph.D. degrees from UMDNJ – Graduate School of Biomedical Sciences in 1983 and 1988 respectively. Since arriving at the PENN in 1988, Hersh has won the Dental School's Excellence in the Teaching of Basic Science Award 20 different times and was also presented with a University Lindback Award in 1993, the highest teaching honor in the entire university. In October 2016, Hersh was the recipient of the University of Pennsylvania One Health Award for his collaborative efforts with faculty from the Schools of Nursing and Medicine in establishing an NIH-funded Center of Excellence in Pain Education. He has published more than 150 scientific articles, abstracts and book chapters in the areas of dental pharmacology, drug interactions, analgesics and local anesthetics. His scholarly and research contributions in the areas of local anesthesia and pain control were recognized by the International Association of Dental Research in 2007 when he was presented with the Distinguished Scientist Award in Pharmacology, Therapeutics and Toxicology.

Mana Saraghi is a board-certified dentist anesthesiologist. She is the dental anesthesiology residency program director at Jacobi Medical Center, Bronx, N.Y.; attending dentist anesthesiologist at SBH Health System, Bronx, N.Y.; and clinical assistant professor at the Herman Ostrow School of Dentistry of the University of Southern California in Los Angeles, Calif. Saraghi maintains a private practice in which she focuses on providing pain and anxiety control for dental patients, including pediatric, adult, geriatric, and special needs patients. She provides thorough, customized anesthesia to best accommodate the combined demands of the patient, the procedure, and the operating dentist.

Sponsored by Sedation Resource

150. Early Interceptive Ortho

PD

Friday, May 26

1:30 – 4:30 PM

Tim Shaughnessy, D.D.S., M.S.

SHAUGHNESSY

Some young children benefit from interceptive orthodontic treatment. This treatment may include eruption guidance of the permanent teeth, control of habits, cross bite correction, and management of crowding in the mixed dentition. Orthopedic correction of skeletal discrepancies may also be accomplished in the young, growing patient. The practitioner should

be able to recognize these potential patients and be familiar with viable treatment options. Most importantly, the skilled clinician must determine when such Phase I treatment is beneficial and defensible.

Tim Shaughnessy received his D.D.S. degree from the University of Michigan and his Master of Science degree in Orthodontics from the University of North Carolina. At UNC, he was the recipient of a National Research Fellowship awarded by the National Institute of Dental Research. He earned an Award of Special Merit from the American Association of Orthodontists for his research and Master's thesis. Shaughnessy has published several articles in the orthodontic literature. He is a frequent speaker and has developed a reputation for his clinical photography and documentation of well-treated cases. He became a diplomate of the American Board of Orthodontics in 1990. He is a fellow of the Pierre Fauchard Academy, the American College of Dentists, and the International College of Dentists. Shaughnessy has practiced in suburban Atlanta, Ga., for 30 years.

Sponsored by Space Maintainers Laboratories

160. Dental Benefits Symposium

PD

Friday, May 26

1:30 – 4:30 PM

Mary Essling, R.D.H., M.S.; Shannon E. Mills, D.D.S.; Dave Preble, D.D.S., J.D., C.A.E.

ESSLING

MILLS

PREBLE

This presentation will discuss: trends driving a paradigm shift in dental benefits, patient centered dental benefits and risk assessment and new and revised dental procedure codes for 2017. It is designed for dentists and team members.

Mary Essling has served with the AAPD since 2007 as the dental benefits director. Essling has previous experience working on dental and medical procedure coding and third-party insurance matters for both the American Dental Association (from 1994-2002) and the American Society of Plastic Surgeons. Essling earned her Bachelor of Science degree from Marquette University and an M.S. in Health Law Policy from DePaul University. In addition, Essling is a licensed registered dental hygienist in Illinois, Indiana and Texas.

Shannon E. Mills is a 1977 graduate of Baylor College of Dentistry and completed his two-year residency in general dentistry at Wilford Hall US Air Force Medical Center at Lackland Air Force Base, Texas, in 1983. Mills is currently the vice president for Strategy and Business Development at PreViser Corporation, an oral health care analytics software company which was acquired by Northeast Delta Dental in March in 2016. He has authored or co-authored numerous scientific papers in peer-reviewed dental and scientific journals and is internationally recognized as an authority on dental infection control and safety.

Dave Preble is the vice president of the American Dental Association's Practice Institute. He practiced general dentistry in both private practice and public health settings for over 20 years before joining the ADA. He graduated from Marquette University in 1976, Georgetown University Dental School in 1980 and St. Thomas University School of Law in 1994. Dave has earned a certificate in non-profit management from the Kellogg School of Management, is a Certified Dental Consultant and a Certified Association Executive.

170. MiniClinics I

Friday, May 26

1:30 – 4:30 PM

1:30 – 2:15 PM

Silver Diamine Fluoride Therapy

Yasmi Crystal, D.M.D., M.Sc.

Silver diamine fluoride, used overseas for decades to arrest decay, recently became available in the U.S. Numerous clinical trials conducted overseas have shown its effectiveness for caries arrest and dentin desensitization. We will present the evidence available and the rationale for its potential use in pediatric practice.

2:15 – 3 PM

The Diagnostic Challenge in Pediatric Patient Part III

Juan Yepes, D.D.S., M.D., M.P.H., M.S., Dr.P.H.

This presentation is the continuation of two previous presentations at AAPD. The lecture brings four interesting patient cases that can walk in the door of any pediatric dentistry practice in the country. Each case includes a brief discussion about the differential diagnosis.

3 – 3:45 PM

Parental Presence in the Operatory: An Update

Lance Kisby, D.M.D.

Routinely, parents were excluded from the operatory because it was felt the parent would be disruptive. This presentation presents an update on current psychological and dental research showing parental presence ensures success. Cooperative behavior will improve compliance which will result in effective dental treatment.

3:45 – 4:30 PM

Bruxism in Children Myths and Truths

Cristina Perez, D.D.S., M.S.

Bruxism in children is a prevalent condition. Many have associated Bruxism to intestinal parasites, allergies, GI disorders, malocclusion, OSA, stress, licit drugs and medications. Current evidence is able to shed light on its etiology so we may be closer to understanding how to help alleviate or prevent it.

Breakfast Rounds I

Saturday, May 27

7 – 8 AM

PD
DT

Breakfast rounds are the perfect opportunity to enjoy breakfast with a recognized clinician to discuss a topic of contemporary mutual interest. This informal small group setting encourages interaction between the speaker and the attendees. The topics are chosen to provide a diversity of subjects while giving particular attention to areas identified by attendees in the past.

BR01 Sedating the Youngest Pediatric Dental Patients

Paloma Perez, D.D.S.

We are increasingly seeing younger patients. These children are the real challenge within our specialty and whether special needs are present or not, effective communication is an issue. Sedations are needed and must be provided wisely, safely and effectively. The pediatric dentist must master these techniques.

BR02 The Use of Silver Diamine Fluoride (SDF) for Children

Gary Badger, D.D.S., M.S.

The presentation discusses the use of SDF, application procedures, results of procedures, and patients' responses to the outcomes. Trouble shooting for complications, if any. Discussion includes questions from providers that may add to the science of the projects. Caries arrest and prevention with SDF will be discussed and questions and contributions by the participants will be solicited.

BR03 Maintaining Your Sanity as a Medicaid Provider

Sidney Whitman, D.D.S.

Efficient and productive practice protocols to enhance practice viability in a Medicaid environment where approximately 40 percent of the births last year were to children covered by Medicaid. Become familiar with what is happening throughout the country in terms of audits and be better prepared to reduce fraud and abuse allegations.

BR04 Cancelled

BR05 Strengthening the Mother-Baby Bond Through Improved Breastfeeding—Tongue and Lip Tie Revision in Nursing Infants

Michael Virts, D.D.S.

This presentation will review the signs and symptoms of lip and tongue restriction in otherwise healthy infants. It will discuss indications for when and how to treat the condition, and will explain the role of the baby's pediatrician and an International Board Certified Lactation Consultant throughout the care process.

BR06 Planning for Successful Anterior Zirconia Restorations

Lawrence Yanover, D.D.S., Ph.D.

Utilizing data collected following placement of over 300 zirconia anterior crowns, criteria for success with this restorative approach will be reviewed. Products from NuSmile, EZPedo and Cheng have been placed. Alternative restorations will be discussed along with their advantages and disadvantages. Pre and post-operative photographs will be featured.

BR07 Inter-Professional, Group-Based Pediatric Dental Practice

Athanasios Zavras, D.D.S., M.S., D.M.Sc.

This presentation will describe a new concept, a group-based pediatric practice where pediatric dentists work together with pediatricians, nurse practitioners, speech pathologists, occupational therapists and nutritionists to provide holistic, continuous care to children, especially the most vulnerable. This new concept has been funded by a HRSA, HHS grant.

BR08 Advocacy Training 101

Kara Morris, D.D.S., M.S.M.; Homa Amini, D.D.S., M.S., M.P.H.

Advocating for our patients and our profession can be rewarding, encouraging, and inspiring. Drs. Amini and Morris will outline ways to advocate for pediatric dentistry at the local, state and federal levels. Emphasis placed on getting started and getting involved.

BR09 Mean Girls and Boys – Tackling the Teenage Patient

Thomas Stark, D.D.S.

Pediatric dental practices should provide a stigma-free environment for our adolescent patients. Understanding the risks and well-being of this population begins by fostering an adolescent-friendly Dental Home. Pertinent psychosocial issues and contemporary topics will be discussed and a systematic, strength-based approach to interviewing teens will be provided.

BR10 Molar Incisor Hypomineralization vs. Molar Incisor Root Malformation: Etiology, Diagnosis and Treatment Challenges

Evelina Karatunova, B.D.S., M.D.S., D.Ch.Dent.

Molar incisor hypomineralization and molar incisor root malformation are different diagnostic entities that both commonly affect first permanent molars and permanent incisors. This presentation will outline current knowledge of their etiology, clinical presentation and diagnosis. It will discuss challenges and options in treatment management.

BR11 The Wand: Computer Assisted Anesthesia System-Making the Day Less Stressful – Introduction and Discussion

Steven Hackmyer, D.D.S.

This presentation will discuss The Wand in depth. The overall benefits using a computer-assisted anesthesia system to both the provider and patient will be examined. The device's flexibility and ease in delivery of anesthesia in different intraoral sites will be discussed.

BR12 Emergencies: Overdose and Airway Issues in Pediatric Dentistry

John Hansford Jr., D.M.D.

This presentation will detail emergent situations that are related to everyday dentistry. For example, appropriate weight based calculations and maximum dosages for local anesthesia, epinephrine, and fluoride will be described; including signs and symptoms of overdose and methods of management.

BR13 Are the Pediatricians Referring to You?

Craig Hollander, D.D.S., M.S.

A discussion on time-tested methods to increase referrals into your office by pediatricians and general dentists and help increase your visibility within your professional community.

BR14 Future Strategies: Decision Making for a Successful Career in an Era of Disruptive Change

Jeffrey Rhodes, D.D.S., M.S.

Strategies for selecting a fulfilling career during a time dental practices are in disruptive change. New competition and outside influences have made solo practices less viable. My belief is that with appropriate decision making processes, a fulfilling career can be found in the midst of corporate, group or solo practices.

200. Coffee Clutch: Networking Rounds for Office Staff

Saturday, May 27

8:30 – 10 AM

Jackie Sanders, R.D.H., M.B.A.

Spend the morning with your peers discussing key issues that come up in your office every day. What is the best way to schedule a special needs patient? How do you talk to parents about Silver Diamine Fluoride? What are some best practices for working in a team? How do you deal with difficult parents? Other topics to be identified by you!

Jackie Sanders is Sunstar's Manager of Professional Relations & Communications, in Schaumburg, Ill. Sanders serves as a liaison responsible for communications with professional and industry associations, educational institutions and the dental professional community. She is a recognized and active opinion leader within the dental hygiene community and associated social networking programs.

210. Combating Caries with Silver Diamine Fluoride—When, Why, and How to Get SMART

Saturday, May 27

8:30 – 11:30 AM

Joel Berg, D.D.S., M.S. and Jeremy Horst, D.D.S., M.S., Ph.D.

BERG

HORST

Dental caries, the most prevalent disease in humans, affects 97 percent of the population in their lifetime. Yet, dental professionals are still primarily using >100 year-old technologies to assess and manage this most prevalent infectious disease.

Recently, new ways of assessing and dealing with dental caries as an infectious disease have been proposed, and new products have been introduced. It is anticipated that the progression of this most significant technological development in dentistry will do more to change the way we practice than anything in recent decades. This course will review the science behind these developments, and will introduce clinically relevant information to practitioners to prepare them to understand related new information as it is introduced to the professionals and consumers. In addition, application of these techniques to early intervention protocols including the use of silver diamine fluoride and other agents to mitigate the impact of caries will be described.

A brush-on liquid called Silver Diamine Fluoride (SDF) has the potential to become the first drug for treating dental caries. It is safe, inexpensive, and simple to apply. Surveys in the U.S. show high levels of patient / parent preference compared to techniques requiring local anesthetic. With reapplication, SDF stops 80-90

percent of cavities, but not right away, and there are not clear indicators of which lesions will keep growing. Clinicians need to be prepared for the black staining and the 10-20 percent of lesions that will keep growing. This session will describe breakthroughs in the science and practice of arresting caries with SDF to interrupt the cycle of disease and restoration that occurs when the underlying problem is out of control. Early adoption has occurred in treatment of pre-cooperative children, patients with special health care needs, and older adults, but this is relevant to all patients with caries. Areas of focus include: clinical protocols, economics, integration with other caries management techniques, incorporation into restorative practice, and the evidence from clinical trials and mechanistic studies. Drs. Horst and Berg aim to build a comprehensive understanding of how the use of SDF to treat and prevent dental caries interfaces with contemporary dentistry.

Joel Berg is dean and professor of pediatric dentistry at the University of Washington School of Dentistry as well as Lloyd and Kay Chapman Chair for Oral Health. He is a diplomate of the American Board of Pediatric Dentistry and is a past president of the American Academy of Pediatric Dentistry.

Jeremy Horst is a practicing biochemist and practicing pediatric dentist. He holds a fellowship in the DeRisi and Featherstone labs at UC San Francisco, where he uses cutting edge genetics and imaging technologies to study the mechanisms of success and failure for treatment of dental caries with Silver Diamine Fluoride (SDF). Horst is presently carrying out five clinical studies incorporating medical interventions for dental caries with microbiome analyses. He has published more than 30 papers and book chapters on genetics and orofacial diseases. His research efforts earned an NIH/NIDCR NRSA, the International Hatton Award, a Warren Magnuson Fellowship, and the Ralph McDonald Award. In his practice he focuses on maximally effective, minimally invasive techniques to stop dental caries and create an easy relationship to dentistry for children and people with special health care needs. Horst recently chaired a committee that establish Guidelines on the use of SDF for caries, and has given over 40 courses on this topic since the material became available May 2015.

230. Medical Emergencies for Office Staff PD

Saturday, May 27

10:30 AM – NOON

Robert Elliott, D.M.D., M.S.

ELLIOTT

Is your office team prepared to respond and handle a patient having a sudden medical emergency? A medical emergency is not only limited to a patient but could happen to a team member, the doctor, a parent, grandparent or other visitor to your office. In addition to the more common disorders and conditions that may arise and how they may be managed, this course will provide all team members with an update on a variety of emergency medical situations and procedures in a fun and entertaining way.

Robert Elliott is a Diplomate of the ABPD and enjoys teaching both dental students as well as residents as an adjunct clinical professor at both the University of North Carolina and University of Louisville Schools of Dentistry. He has been in private practice for 18 years in Cary, N.C.

250. New Dentist Course

Saturday, May 27

12:30 – 3 PM

The New Dentist Committee created an interactive forum allowing you to rotate through various discussions every 30 minutes. Clinical topics include: bioactive materials, minimally invasive dentistry and SDF, behavior management and sedation. Practice management pearls include contracts and associateships, ACA, debt management and social media marketing.

Bioactive Materials – Josh Wren

Silver Diamine Fluoride / Minimally Invasive Dentistry – Tim Wright

Behavior Management / Sedation – Bobby Thikkurissy

Opening a Practice – Courtney Alexander

Contracts / Associateships – Thomas Kohn

Affordable Care Act – Scott Schwartz

Debt Management—SoFi – Nisha Choksi

Using Online Review to Help Build Your Practice – John Carroll, Yelp

260. AAP: Oral Health and Dental Aspects of Child Abuse and Neglect

Saturday, May 27

1 – 4 PM

Anupama Tate, D.M.D., M.P.H.; James Lukefahr, M.D.; Susan Fisher-Owens, M.D., M.P.H.

TATE

LUKEFAHR

FISHER-OWENS

A continuing education course designed to educate dentists, dental hygienists, dental assistants and others about the problems of child abuse and neglect, domestic violence, dental neglect, bullying and human trafficking and what can be done.

Anupama Rao Tate is an associate professor of pediatrics at the George Washington University School of Medicine. She is a faculty member in the Department of Pediatric Dentistry in the Goldberg Center for Community Pediatric Health at Children's National Medical Center. She serves as the director of Advocacy and Research. She also is director of the District of Columbia Pediatric Oral Health Coalition. She is a Trustee and chairs the Grants and Programs Committee of Healthy Smiles, Healthy Children. She also serves on the Evidence-Based Dentistry Committee, Council of Clinical Affairs, and chairs the Consumer Review Committee of the AAPD. Currently she is President of the D.C. Chapter of the AAPD.

James L. Lukefahr is a professor in the Division of Child Abuse Pediatrics at the University of Texas Health Science Center at San Antonio. Lukefahr joined the Division in June 2007 and serves as the medical director of the Center for Miracles, which is the child abuse medical evaluation facility at the Children's Hospital of San Antonio. He previously was a professor at the University of Texas Medical Branch Department of Pediatrics in Galveston from 1996 until 2007. Lukefahr has written numerous scholarly articles on child abuse and neglect. He was appointed by Texas Governor George W. Bush to serve on the Children's Trust Fund of Texas Council from 1999 until 2001, and also served on the Texas Children's Justice Act Task Force from 2007 to 2013.

Susan Fisher-Owens is associate clinical professor of Pediatrics at the UCSF School of Medicine and Associate Clinical Professor of Preventive and Restorative Dental Sciences, UCSF School of Dentistry, in San Francisco, Calif. Clinically, she works as a primary care pediatrician and faculty preceptor. She spends the remainder of her time serving as a children's oral health advocate and researcher, working with medical providers to increase their knowledge and interventions in oral health and with dental professionals to increase their understanding and application of contextual factors to care. Her paper on "Influences on Children's Oral Health: A Conceptual Model" has led to other work being conducted to investigate and reduce oral health disparities and improve care, and "Primary Teeth," the clinical program she started to introduce oral health care into the pediatric practice setting was recognized with the Academic Pediatric Association's Health Care Delivery Award in 2011. She also serves on the American Academy of Pediatrics National Section on Oral Health.

Saturday, May 27

1 – 4 PM

1 – 1:45 PM

Medical Management of Dental Caries in Primary Dentition Using Silver Nitrate: 18-Month Results of Randomized Clinical Trial *Michael Kanellis, D.D.S., M.S.*

This presentation reports 18 month data from an ongoing randomized clinical trial comparing conventional restorative treatment to medical management of dental caries using silver nitrate in a population of Amish children in Iowa. Clinical protocols will be shared as well as lessons learned regarding case selection.

1:45 – 2:30 PM

Tooth Anomalies Revisited *Ulrich Klein, D.M.D., M.S.*

Tooth anomalies are part of many syndromes. Recent findings have even implicated them as potential markers for certain cancers. Tooth anomalies often occur in patterns that may allow for prediction of clinical situations. This presentations gives an overview, presents the latest findings on this topic, and discusses clinical implications where known.

2:30 – 3:15 PM

It's Fun to Stay at the YMTA- A Review of Clinical Uses of MTA in Pediatric Dentistry *Jarod Johnson, D.D.S.*

This course is designed to improve dental skills in the pulpal management of primary and permanent teeth impacted by trauma or caries. Specifically the course will review current research on mineral trioxide aggregate and provide treatment protocols for the uses in pediatric dentistry.

3:15 – 4 PM

Sleep-Disordered Breathing: A Rational Approach for Treating our Patients in Need Based on 30 Years of Discovery *George Cisneros, D.M.D., M.M.Sc.S.S.*

So-called 'experts' have been 'selling' us on how to market and manage intra-oral appliances in treating / managing our patients with sleep-disordered breathing. This presentation will outline a practical approach to not only help us assist in the management of our patients but also review the science behind the appliances themselves.

Robert Delarosa, D.D.S.; Cavan Brunsdan, D.D.S.; Jeannie Beauchamp, D.D.S.

DELAROSA BRUNSDEN BEAUCHAMP

What is your favorite TedTalk? Come listen to some of AAPD's favorite story tellers. They definitely have ideas worth sharing!

Create a Smile with Business Style—How Corporate Business Principles Improve Pediatric Dental Success

There is great joy in achieving success as a pediatric dentist. We all learned the dental part in school, we get to experience it in private practice, but we only succeed with good business principles. Engage with Dr. Brunsdan as he describes the development of a practice over time.

Why Are You Here?

This lively presentation will help the audience discover life's purpose through a simple exercise, and assist them in a renewed focus on their professional and personal commitment. The result will be a message both positive and fulfilling.

Build Your Practice by Being Involved in Your Community

Robert L. Delarosa is the founding partner of Associates in Pediatric Dentistry. He is a Board Certified Diplomate of the American Board of Pediatric Dentistry, and a Fellow of the American Academy of Pediatric Dentistry and the American College of Dentists. He obtained his Doctor of Dental Surgery Degree from the Louisiana State University School of Dentistry, where he received the ASDC Outstanding Undergraduate Student Award in Pediatric Dentistry. He completed his specialty training in pediatric dentistry at the University of Texas Health Science Center at San Antonio, serving as senior chief resident. He has served in leadership roles in numerous dental professional organizations at the state, regional and national levels. He has also served as president of the American Academy of Pediatric Dentistry, Louisiana Academy of Pediatric Dentistry, and the Greater Baton Rouge Dental Association. He holds membership in the American Dental Association, American Academy of Pediatric Dentistry, American Academy of Pediatrics, Southwestern Society of Pediatric Dentistry, Louisiana Academy of Pediatric Dentistry, the Louisiana Dental Association and the Greater Baton Rouge Dental Association.

Cavan M. Brunsdon is the owner and director of KidZdent, a pediatric dentistry and orthodontic practice in central New Jersey. He directs The KidZdent Center for Special Needs Dentistry, a model concept in providing dental care to patients with special healthcare needs, especially patients with autism. This center provides comprehensive care, including orthodontics to a population of over 3,000 children on the autism spectrum. Brunsdon is a former elementary school teacher and school administrator who now applies his background in education to his community and to his patients. He is active in the American Academy of Pediatric Dentistry and the New Jersey Dental Association, where he manages state-wide initiatives related to children's dental health. For the past twelve years, he has served as the New Jersey State Manager of the Give Kids A Smile program, a program that provides free dental care to children who have difficulty accessing care. This program has delivered free dental care to over 36,000 children representing over 7 million dollars of free dental care. In addition, every child is provided an opportunity to join a dental home. Brunsdon also provides presentations on pediatric behavioral management of the difficult child as well as the role of dentists in managing the autistic child.

Karyl Jean (Jeannie) Beauchamp received her D.D.S. from the University of Tennessee, Memphis, College of Dentistry. After completing a residency in pediatric dentistry, also at the University of Tennessee in 1993, she began private practice in Clarksville, Tenn. She has been active with AAPD with recently being the Southeast District Trustee and prior to that she was the Parliamentarian. She also served the AAPD as a member then chairman of the Council on Communications. She is currently on the Political Action Committee, and Chair of the Committee on Interprofessional Relations. She was president of the Tennessee Academy of Pediatric Dentistry and now is on their board.

BR15 Sedating the Youngest Pediatric Dental Patients *Paloma Perez, D.D.S.*

We are increasingly seeing younger patients. These children are the real challenge within our specialty and whether special needs are present or not, effective communication is an issue. Sedations are needed and must be provided wisely, safely and effectively. The pediatric dentist must master these techniques.

BR16 The Use of Silver Diamine Fluoride (SDF) for Children *Gary Badger, D.D.S., M.S.*

The presentation discusses the use of SDF, application procedures, results of procedures, and patients' responses to the outcomes. Trouble shooting for complications, if any. Discussion includes questions from providers that may add to the science of the projects. Caries arrest and prevention with SDF will be discussed and questions and contributions by the participants will be solicited.

BR17 Maintaining Your Sanity as a Medicaid Provider *Sidney Whitman, D.D.S.*

Efficient and productive practice protocols to enhance practice viability in a Medicaid environment where approximately 40 percent of the births last year were to children covered by Medicaid. Become familiar with what is happening throughout the country in terms of audits and be better prepared to reduce fraud and abuse allegations.

BR18 Cancelled

BR19 Strengthening the Mother-Baby Bond Through Improved Breastfeeding—Tongue and Lip Tie Revision in Nursing Infants *Michael Virts, D.D.S.*

This presentation will review the signs and symptoms of lip and tongue restriction in otherwise healthy infants. It will discuss indications for when and how to treat the condition, and will explain the role of the baby's pediatrician and an International Board Certified Lactation Consultant throughout the care process.

BR20 Planning for Successful Anterior Zirconia Restorations*Lawrence Yanover, D.D.S., Ph.D.*

Utilizing data collected following placement of over 300 zirconia anterior crowns, criteria for success with this restorative approach will be reviewed. Products from NuSmile, EZPedo and Cheng have been placed. Alternative restorations will be discussed along with their advantages and disadvantages. Pre and post-operative photographs will be featured.

BR21 Inter-Professional, Group-Based Pediatric Dental Practice*Athanasios Zavras, D.D.S., M.S., D.M.Sc.*

This presentation will describe a new concept, a group-based pediatric practice where pediatric dentists work together with pediatricians, nurse practitioners, speech pathologists, occupational therapists and nutritionists to provide holistic, continuous care to children, especially the most vulnerable. This new concept has been funded by a HRSA, HHS grant.

BR22 Advocacy Training 101*Kara Morris, D.D.S., M.S.M.; Homa Amini, D.D.S., M.S., M.P.H.*

Advocating for our patients and our profession can be rewarding, encouraging, and inspiring. Drs. Amini and Morris will outline ways to advocate for pediatric dentistry at the local, state and federal levels. Emphasis placed on getting started and getting involved.

BR23 Mean Girls and Boys—Tackling the Teenage Patient*Thomas Stark, D.D.S.*

Pediatric dental practices should provide a stigma-free environment for our adolescent patients. Understanding the risks and well-being of this population begins by fostering an adolescent-friendly Dental Home. Pertinent psychosocial issues and contemporary topics will be discussed and a systematic, strength-based approach to interviewing teens will be provided.

BR24 Molar Incisor Hypomineralization vs. Molar Incisor Root Malformation: Etiology, Diagnosis and Treatment Challenges*Evelina Karatunova, B.D.S., M.D.S., D.Ch.Dent.*

Molar incisor hypomineralization and molar incisor root malformation are different diagnostic entities that both commonly affect first permanent molars and permanent incisors. This presentation will outline current knowledge of their etiology, clinical presentation and diagnosis. It will discuss challenges and options in treatment management.

BR25 The Wand: Computer Assisted Anesthesia System-Making the Day Less Stressful – Introduction and Discussion*Steven Hackmyer, D.D.S.*

This presentation will discuss The Wand in depth. The overall benefits using a computer-assisted anesthesia system to both the provider and patient will be examined. The device's flexibility and ease in delivery of anesthesia in different intraoral sites will be discussed.

BR26 Emergencies: Overdose and Airway Issues in Pediatric Dentistry*John Hansford Jr., D.M.D.*

This presentation will detail emergent situations that are related to everyday dentistry. For example, appropriate weight based calculations and maximum dosages for local anesthesia, epinephrine, and fluoride will be described; including signs and symptoms of overdose and methods of management.

BR27 Are the Pediatricians Referring to You?*Craig Hollander, D.D.S., M.S.*

A discussion on time-tested methods to increase referrals into your office by pediatricians and general dentists and help increase your visibility within your professional community.

BR28 Future Strategies: Decision Making for a Successful Career in an Era of Disruptive Change*Jeffrey Rhodes, D.M.D., M.S.*

Strategies for selecting a fulfilling career during a time dental practices are in disruptive change. New competition and outside influences have made solo practices less viable. My belief is that with appropriate decision making processes, a fulfilling career can be found in the midst of corporate, group or solo practices.

BR29 Hanging Your Single Shingle—Starting Your Own Practice*Robert Elliott, D.D.S., M.S.*

Strategies on starting a solo private practice will be discussed. Attendees will receive a manual that sequences the events and suggests a timeline when putting everything together to open an office. Topics covered range from initial concept to the end of your first year of practice.

300. String of Pearls

Sunday, May 28

8:30 – 11:30 AM

PD
DT

Always popular, the format of this session allows a wide variety of ideas and concepts to be strung together in a brief amount of time. The informal atmosphere of the presentation encourages idea sharing and all who wish to contribute are encouraged to do so. The following people are presenting their pearls of wisdom with us at this year's meeting.

8:30 – 8:45 AM

Reviewing a Comprehensive Evaluation Protocol for Infants With Lip and Tongue Frenum Restriction for Laser Frenotomy

Martin Kaplan, D.M.D.

This presentation will review an objective check list to assist in the evaluation and decision process for deciding to treat a frenum of an infant with a breastfeeding or bottle feeding problem.

8:45 – 9 AM

Achieving Painless Injections without Topical Anesthesia

Warren Brill, D.M.D., M.S. (HYG), F.A.A.P.D.

We are classically taught to use a topical anesthetic agent applied to a dry surface for two minutes before injection. This technique can be uncomfortable for the child, as the agent can drip from the site to the tongue or pharynx, even when cotton 2x2s or suction is used to prevent this. In addition, it is difficult, if not impossible to determine the dosage of topical agent administered, increasing the chance of untoward effects, such as methemoglobinemia. The technique to be demonstrated uses a device that desensitizes the soft tissues so that the child feels little or no discomfort. It is effective on both free gingiva at the cheek side of the teeth, but also on the attached gingiva of the lingual and palate.

9 – 9:15 AM

Clinical Antimicrobial Treatment and Bacterial Testing

Ian Marion, D.D.S., M.S.

This presentation will overview a technique to perform chair-side bacterial testing to guide preventative therapies. It will also overview techniques and applications of preventative and caries arresting medications.

9:15 – 9:30 AM

Increasing Appointment Compliance in the Age of Technology: An Evaluation of Appointment Reminder Systems Effectiveness in Private and Public Health Settings

David Avenetti, D.D.S., M.S.D., M.P.H.

Missed dental appointments lead to delayed receipt of care for patients and an inefficient use of resources. With modern technology, there are more appointment reminder systems available for patients. This presentation will review the effectiveness of various appointment reminders and demographic preferences in the age of expanded technology. This presentation is relevant for both private practice and public health settings.

9:30 – 9:45 AM

Zirconia Crowns for Restoration of Severely Carious Primary Anterior Teeth: Overcoming Esthetic Challenges

Ahmed Rady, B.D.S., M.Sc., Ph.D.

The esthetic concern of clinical decision to restore severely carious primary anterior teeth in children has been a challenge to pediatric dentists. This presentation will highlight success and failure of many challenging clinical cases of restoring such teeth using different modalities such as intra-canal fiber posts and zirconium crowns.

9:45 – 10 AM

The Timing and Treatment Methods Needed to Preserve Ectopically Erupting Permanent Teeth in the Transitional Dentition

Keaton Howe, D.D.S., M.S.

This clinically-based seminar will discuss new trends in the ever-changing growth and development of developing permanent teeth and apply this to the early recognition of ectopic eruption in the transitional dentition. Clinical treatment strategies will illustrate how to preserve the position and function of ectopically erupting permanent teeth for their entirety.

10 – 10:15 AM

Mixed Dentition Molar Repositioned: A Simplified New Appliance to Regain Space and Upright Mandibular First Molar

Else Echeverri, D.D.S.

Regaining space loss of a permanent mandibular first molar that has inclined and mesially migrated is difficult in the mixed dentition due to anchorage. This system presents a straight forward alternative with a minimum amount of hardware requirements that allows the correction without extruding while distalizing the molar.

10:15 – 10:30 AM

The Role of the Pediatric Dentist in Obstructive Sleep Apnea*Cristina Perez, D.D.S., M.S.*

Obstructive sleep apnea (OSA) is an under diagnosed condition in our children. OSA may have many implications in children's health that vary from low school performance, increased incidence for accidents to mal-occlusions and bruxism. Information is needed on how a pediatric dentist can identify red flags that may help to diagnose OSA.

10:30 – 10:45 AM

Pulp Fiction: Top Ten Myths of the Primary Dental Pulp*Jarod Johnson, D.D.S.*

Formocresol has been the gold standard for many years in vital pulpal therapy in the primary dentition. Recent developments in materials led by MTA, challenge old standards. This presentation reviews common misconceptions about the primary dental pulp as it relates to caries and trauma for pulpal therapy.

10:45 – 11 AM

Resin Infiltration for Smooth Surface Early Caries Management in Pediatric Dentistry*Aikaterini Kavvadia, M.Dent.Sc., Ph.D.*

Resin infiltration is a minimal invasive technique used successfully in pediatric dentistry to manage buccal and interproximal smooth surface incipient carious lesions. Low viscosity resin permeates the decalcified porous enamel and fortifies it against the acid dissolution thus halting the progression of the lesion as well as improving the esthetics.

11 – 11:15 AM

Captivating Production on Your Schedule*Natalie Burnside, R.D.H.*

Tips on using your staff and patients to captivate production already on your schedule throughout your day. We will discuss what staff members are needed, including the doctor, and what their roles will be to accomplish this goal.

11:15 – 11:30 AM

Before You Jump to General Anesthesia with Children Who Have ADHD*Robert Jones, D.D.S., Ph.D.*

This presentation will provide practitioners with an overview of ADHD medications and examine how children have genetic differences that make some medications counter productive to alleviate symptoms. For pediatric dentists, the pearl is that some children are just one appropriate medication away from better behavior.

310. A Snapshot of Street and Prescription Drug Abuse and the Impact on Your Dental Practice

PD

Sunday, May 28

8:30 – 11:30 AM

Harold Crossley, D.D.S., M.S., Ph.D.

CROSSLEY

What questions should I be asking my patients to avoid drug interactions with street drugs? What is the impact on my practice of the recent resolutions, approved by the American Dental Association, for providing dental care for patients who are and/or have been chemically dependent? What are some of the oral manifestations of street drug abuse? Do I have to take any precautions with the dental patient who is under the influence? The dental team is in a unique position providing dental care to a patient population that may be regular users or experimenting with mood altering drugs. This graphic presentation will help you identify and manage the substance abusing patient. Discussion includes the signs and symptoms of commonly abused prescription and illicit drugs.

Harold L. Crossley is professor emeritus at the University of Maryland Dental School. A native of Rhode Island, Crossley received a Bachelor of Science degree in Pharmacy from the University of Rhode Island in 1964. He later was awarded the Master of Science (1970) and doctorate degrees (1972) in Pharmacology. The University of Maryland Dental School in Baltimore awarded Crossley the D.D.S. degree in 1980. The liaison between the classroom and his part-time dental practice produced a practical approach to understanding the pharmacology of drugs used in the dental office. Crossley has co-authored a number of articles and four books dealing with a variety of topics within the field of pharmacology. Other areas of expertise include the pharmacology of street drugs and chemical dependency. He serves on the Maryland State Dental Association's Well-Being Committee, is an active member of Phi Kappa Phi, Omicron Kappa Upsilon Honorary Dental Society, the American College of Dentists, International College of Dentists, and an honorary member of the Thomas B. Hinman Dental Society. He was the recipient of the 2008 Gordon Christensen Lecturer Recognition award presented by the Chicago Dental Society and the recipient of the 2012 Award of Distinction presented by the Academy of Dentistry International for his efforts in Continuing Dental Education. He has been a consultant for the United States Drug Enforcement Administration and other law enforcement agencies since 1974. Drawing on this unique background, Crossley has become nationally and internationally recognized as an expert on street drugs and chemical dependency as well as the clinical pharmacology of dental drugs.

AAPD Residents

First Timers' Reception

Thursday, May 25

5:30 – 6:30 PM

Sponsored by NuSmile

Keynote Address: Mel Robbins and Awards Ceremony

Friday, May 26

7:30 – 9 AM

My Kid's Dentist Poster Research Competition

Friday, May 26

9 AM – 5 PM

My Kid's Dentist Poster Research Competition is available in the Exhibit Hall. Different topics are presented on iPads and monitors every 20 minutes. Stop by to meet the authors and discuss their presentations with them!

Sponsored by Pacific Dental Services, Inc.

New Pediatric Dentist Happy Hour: Pose in the Gaylord National Resort

Friday, May 26

5:30 – 7:30 PM

Sponsored by Treloar & Heisel and MedPro

AAPD Welcome Reception: Chance of a Lifetime

Friday, May 26

7:30 PM

FedExField

Sponsored by Sunstar Americas, Inc.

Ticketed Events

The New Dentist Happy Hour and Presidents' Farewell Dinner are ticketed events. Tickets must be purchased in advance when registering to attend AAPD 2017.

See the descriptions for all social events on page 27.

220. NuSmile GSRA and the Sunstar Research Fellowship Awards

Saturday, May 27

8:30 – 11:30 AM

Sponsored by NuSmile and Sunstar Americas, Inc.

My Kid's Dentist Poster Research Competition

Saturday, May 27

9 AM – 5 PM

Social & Networking Events

First Timers' Reception

Thursday, May 25
5:30 – 6:30 PM

Join other first-time attendees to make new acquaintances from your district or mingle with old friends. The AAPD board of trustees welcomes you to the AAPD 2017!

Sponsored by NuSmile

PAC Donor Reception

Friday, May 26
5 – 6 PM

(Invitation only)

New Pediatric Dentist Happy Hour: Pose in the Gaylord National Resort

Friday, May 26
5:30 – 7:30 PM

(Ticketed Event)

Located in the Gaylord National Resort, Pose is the place to be! The 18th floor lounge offers floor to ceiling windows gazing out over the beautiful National Harbor. Whether you relax in the comfortable modern lounge and listen to music or step out onto the terrace to take in the D.C. skyline, this event will not disappoint.

Meet and connect with fellow new pediatric dentists, then head right outside of the hotel to hop on the transportation provided by AAPD to the Welcome Reception.

Sponsored by Treloar & Heisel and Medical Protective

AAPD Welcome Reception: Chance of a Lifetime

Friday, May 26
7:30 PM

FedExField

How often do you get the opportunity to kick a field goal on a real NFL field? Not too often! Bring your office staff, friends and family as all are invited to participate in this chance of a lifetime at FedExField. You know AAPD will have you covered with plenty of food and beverages, so join us for a night on the turf of activities, games and dancing.

Sponsored by Sunstar Americas, Inc.

SUNSTAR

GUIN BUTLER GUIDOR

International Reception

Saturday, May 27
5:30 – 7:30 PM

This reception began in 2010 at the Annual Session and has continued to be a popular event for international members and attendees. Join members of the AAPD board of trustees, learn more about the AAPD and network with fellow international attendees before enjoying your evening in Washington, D.C.

Career Fair

Saturday, May 27
3 – 5 PM

The Career Fair is a great opportunity for a new pediatric dentist seeking their first practice position or the more experienced dentist who is looking for a change to network with hiring organizations.

For more information on exhibiting or to download the Career Fair form, visit <http://www.aapd.org/annual>. The cost for AAPD Members is \$150; recruitment companies may exhibit at the price of \$500.

Sponsored by Nusmile

Presidents' Farewell Dinner

Sunday, May 28
6:30 – 10:30 PM

Smithsonian National Museum of Natural History

Ever dined with an African Elephant? The AAPD 2017 Farewell Dinner is your chance! Join Henry the Elephant and President Jade Miller for a night of exclusive access to all that the Smithsonian National Museum of Natural History has to offer. AAPD promises to deliver another exquisite evening complete with friends, delicious food, laughter and a whole lot of dancing!

Reception is sponsored by Treloar & Heisel

Dinner is sponsored by MAM

Additional Courses & Workshops

Preconference Course Frenums to Pacifiers, Pearls for Treating Toddlers

Thursday, May 25

8:30 AM – 4:45 PM

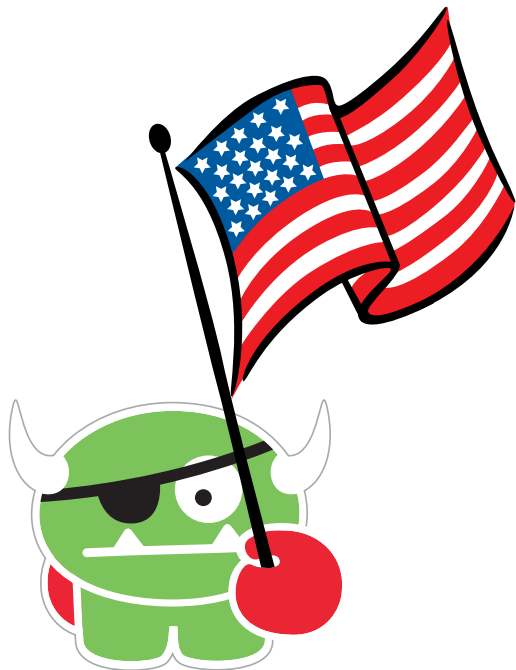

Cost: \$250

Dave Tesini, D.M.D., M.S.; Bobak Ghaheri, M.D.; Scott Rickert, M.D.; German Ramirez-Yanez, D.D.S., Pedro Cert, M.D., Sc., M.Sc., Ph.D.; Josh Wiesman, M.S.

With the AAPD's successful messaging on the Age 1 Dental Home, pediatric dentists are confronting issues of toddler dental care daily; in fact it takes up major portion of the pediatric dentist's morning office hours. Providing oral health care to this cohort requires a special knowledge of diagnostic factors and treatment techniques not inherent in the treatment of the rest of our patients.

Learning Objectives

- Review the clinical importance of growth and development in the comprehensive evaluation of the infant and toddler
- Provide evidence based guidelines on the management of ankyloglossia and the maxillary frenum as they relate to breast feeding and oral development
- Explore the importance of the developing airway and tongue posture in the growth and development of the oro-facial complex
- Understand how non-nutritive sucking habits can affect oral development and occlusal disharmony
- Learn how to identify and manage developing malocclusions in the primary dentition

PD
DT

BLS Skills Check

Friday, May 26

9 AM – 1 PM

Saturday, May 27

8 AM – NOON & 1 – 5 PM

Cost: \$100

PART 2 HANDS-ON

The AAPD will be offering **Part 2 only** of the HeartCode BLS course. This is the hands-on testing requirement of the HeartCode BLS course. After completing the online portion, students attend a structured BLS Hands-On Session with an AHA Instructor. This session focuses on meaningful skills practice, debriefing, team scenarios, discussions of local protocols, and skills testing. Students must bring their certificate of completion from the online class to the BLS Skills Check.

Part 1 HeartCode BLS Online Class: NOT OFFERED BY AAPD. Students will first take the BLS class online from the American Heart Association. HeartCode BLS uses a variety of eLearning assets such as dramatizations, eSimulations, animations, self-directed learning, and interactive activities to teach students BLS knowledge and skills. Students will take the online class from www.onlineaha.org and bring their certificate of completion to the BLS Skills Check held at the conference. The fee for Part 1 (the online class) is the responsibility of the student.

BLS ONLINE CLASS: Visit www.onlineaha.org to register

PALS Skills Check

Friday, May 26

9 AM – 1 PM

Saturday, May 27

8 AM – NOON & 1 – 5 PM

Maximum Participants: 35

Cost: \$100

PART 2 HANDS-ON

The AAPD will be offering **Part 2 only** of the HeartCode PALS course. This is the hands-on testing requirement of the HeartCode PALS course. Students will demonstrate the skills they have learned in the online class including: one and two person infant and child CPR, rescue breathing, and fluid bolus administration. Students must bring their certificate of completion from the online class to the PALS Skills Check. In this environment, students apply their knowledge to real-time decision-making and skills development. Debriefings and coaching are provided immediately after each simulation to facilitate learning about pediatric advanced life support.

Part 1 HeartCode PALS Online Class: NOT OFFERED BY AAPD. This is a web-based, self-directed program that teaches healthcare providers knowledge and skills needed to recognize and prevent cardiopulmonary arrest in infants and children. Students will take the online class from www.onlineaha.org and bring their certificate of completion to the PALS Skills Check held at the conference. The fee for Part 1 (the online class) is the responsibility of the student.

PALS ONLINE CLASS: Visit www.onlineaha.org to register

Evidence-Based Dentistry Workshop

Saturday, May 27

8:30 AM – 5 PM

Peter H. Buschang, Ph.D. and N. Sue Seale, D.D.S., M.S.D.

Maximum Participants: 20

Cost: \$250

Evidence-based dentistry has become the watchword for quality care and will be increasingly important to the practice of pediatric dentistry. Your ability to size up research – quickly and correctly – is essential in a world where publication rates can outpace the ability to stay current.

In this hands-on digital session, you will discover how to identify the best clinical evidence as a part of a practical understanding of evidence-based methods. You will learn how to formulate clinical questions using PICO (Population, Intervention, Comparator and Outcomes), a method to refine clinical questions and facilitate computer searches.

If you would like to go from 2,000 hits to the most relevant 20 online resources in far less time than it takes you now, this course explains how to efficiently perform literature searches based on specific clinical questions. You will develop the necessary computer skills and find out the secrets of using PubMed, a free online index of health science literature.

Through active discussion and skills practice, you will learn how to critically evaluate published research studies and rank them according to the strength of evidence they provide, ranging from expert opinion and case studies to randomized controlled trials and systematic reviews.

A must-attend course for lifelong learners in the clinical field of pediatric dentistry.

Dr. Peter Buschang is professor of orthodontics and director of orthodontic research at Baylor College of Dentistry. He received his Ph.D. in from the University of Texas at Austin in 1980; from 1980–1983 he was a NIDR postdoctoral fellow in the Department of Orthodontics, University of Connecticut Health Science Center; from 1983–1988 he was a FRSQ scholar in the Orthodontic section and Human Growth Research Center, University of Montreal. He regularly reviews articles for numerous journals and has served as associate editor for several journals (currently *Angle Orthodontist*). Buschang has published over 150 peer-reviewed articles and book chapters focusing on craniofacial growth, developmental adaptations associated with treatments, and oral-motor function. He is director of Baylor's graduate core course entitled "Research Design and Methodology".

Dr. N. Sue Seale is professor and chairman of the Department of Pediatric Dentistry at Baylor College of Dentistry, Texas A&M Health Science Center, as well as director of the advanced education program in pediatric dentistry at Baylor. She is director of dental service at Texas Scottish Rite Hospital of Children and chairman of the Department of Dentistry at Children's Medical Center of Dallas. In 2001, the AAPD named her Pediatric Dentist of the Year and also presented her with the Merle C. Hunter Leadership Award in 2003. She is Editor-in-Chief of the AAPD Journal *Pediatric Dentistry*.

Washington, D.C. Tours

We are proud to offer a variety of tours that will let you experience everything Washington, D.C., has to offer through unique interactive activities. Visit <https://www.regonline.com/aapd2016tours> to register now! All tours include transportation.

Illuminated Washington Tour

Thursday, May 25
7 – 11 PM

Price per person: \$50

The magical feeling of this illuminated city will give you an entirely new perspective of the nation's capital.

Washington is resplendent at night when the monuments shine in the darkness. See the Smithsonian Museums, specifically the Castle, shine with a divine silhouette against the evening sky. From this vantage point the beautifully lit Washington Monument and the U.S. Capitol Building offer incredible photo opportunities. The Jefferson Memorial is a grand homage to the primary author of the Declaration of Independence and one of our founding fathers.

Next, guests will have the chance to view the National World War II Memorial, which pays tribute to those who served in the last great war. Stroll through the National Mall to visit the Lincoln, Vietnam Veterans and Korean War Veterans Memorials. The Lincoln Memorial is magnificent at night, shimmering in the National Reflecting Pool. See the black granite of the Vietnam Veterans Memorial glow and reflect the etched names of over 58,000 men and women to whom it is dedicated.

Time permitting, the group will have the opportunity to visit the newest memorial in our nation's capital, the Martin Luther King Jr. Memorial.

Welcome to Washington Tour

Friday, May 26
8:30 AM – NOON

Price per person: \$50

Washington, D.C., located at the confluence of the Potomac and Anacostia Rivers, is one of only three planned federal capitals. George Washington chose this site in 1790, as it lies at the historic mid-point between the northern and southern colonies. Pierre Charles L'Enfant was selected to design the city as the capital for the new United States. That city plan has evolved into a beautiful and exciting showplace for the federal government, with world-class museums, gardens and monuments to this nation's notable history.

Guests will be introduced to the history and architecture of D.C., with stories, facts and trivia as you explore monuments, memorials and notable buildings (by coach) such as The White House, the Inaugural Parade Route, Smithsonian Institution Complex and the Washington Monument.

Next, stop at one of the most visited areas of the city, the National Mall: a treasured park that boasts some of the most recognizable buildings in the world. Guests will visit the Lincoln Memorial, Vietnam War Veterans Memorial, the Korean War Veterans Memorial, the Reflecting Pool and the World War II Memorial.

This is one of the world's most beautiful cities, which you will enjoy even more in the company of your storytelling guide!

National Mall Shuttle

Friday, May 26 & Saturday,
May 27
10 AM–4 PM

Price per person: \$45

Shuttle service to/from the Gaylord National Resort & Convention Center and The National Mall.

Departures from the Gaylord National Resort & Convention Center will leave from the Woodrow Wilson entrance every two hours between 10 a.m. – 4 p.m.

Departures from The National Mall will leave from the Madison Drive entrance of the National Museum of American History every two hours between 11 a.m. – 3 p.m.

Capital Collection Tour

Saturday, May 27
8:30 AM – NOON

Price per person: \$165

Set atop Jenkins Hill, overlooking the city of Washington, D.C., sits the United States Capitol. Its cast iron dome is the most imposing architectural structure in the city and the chief icon of the nation's identity as a federal republic and that of the legislative branch. Enjoy a private tour of this hallowed building and you will be awed by the Rotunda, the symbolic center of the Capitol and of the city itself. Visit the Statuary Hall (the original House chamber), the Old Senate chamber and the Crypt, which was intended to be the final resting place of George Washington.

The final stop will be the Library of Congress—Thomas Jefferson Building, an elegant neoclassical building lavishly decorated in the spirit of the Gilded Age. The building holds the world's largest library and is home to Jefferson's handwritten draft of the Declaration of Independence.

Hillwood Museum & Gardens

Saturday, May 27
8:30 AM – 12:30 PM

Price per person: \$70

Today guests will travel to the former home of Marjorie Merriweather Post for a firsthand look at the opulent lifestyle and aristocratic luxury of her 25-acre estate, known as Hillwood. Post was the heiress of the Post cereal fortune, the wife of Franklin D. Roosevelt's first ambassador to the Soviet Union and mother of famous actress Dina Merrill. She furnished her 40-room Georgian-Style Mansion with a comprehensive collection of 18th and 19th century Russian and French decorative art, including a marvelous collection of Fabergé eggs, Russian Imperial icons, rare tapestries and priceless objects d'art. Art highlights include period pieces from the reign of Catherine the Great and the nuptial crown worn by Empress Alexandra at her wedding to Nicolas II in 1894.

As if the house isn't enough to take your breath away, a lavish stroll through the gardens and greenhouse will be equally as charming. Assisted by prominent landscape architects and garden designers of the time, Post conceived of outdoor rooms, bounded by hedges or large plants. The elaborately landscaped grounds include an authentic Japanese garden, a delightful Russian dacha (summer house) and greenhouse which shelters a stunning display of 5,000 orchids, as well as other lush foliage used to decorate the home.

D.C. Neighborhood Gems

Saturday, May 27
12:30 PM – 4:30 PM

Price per person: \$70

Guests will begin with a tour of Washington National Cathedral. Since the celebrated moment in 1907 when workmen laid the foundation stone of Washington National Cathedral, the majestic structure has played a vital role in our nation's history. The Cathedral has long served as the grand spiritual center where Americans unite to worship and pray, mourn the passing of world leaders, and confront the pressing moral and social issues of the day.

Of Neo-Gothic design closely modeled on English Gothic style of the late fourteenth century, it is the sixth-largest cathedral in the world, the second-largest in the United States, as well as the fourth-tallest structure in Washington, D.C. The Cathedral is known for its stunning architecture and stained glass but also its numerous quirky gargoyles, ranging from faux security cameras to Darth Vader.

Next, guests will embark on a tour of Georgetown, one of Washington D.C.'s gem neighborhoods, complete with history, culture, grand estates, fine restaurants and world-class shopping. From the beautiful canals and waterfront history, to the amazing architecture and political intrigue, this famous neighborhood has many stories.

After guests view highlights of the neighborhood, they will have some time to explore the area on their own to experience the fabulous boutiques and shops of Georgetown; featuring specialty shops, top designers, and every brand in between.

Washington Nationals Game

Saturday, May 27
GAME TIME TBD

Price per person: \$125

Washington Nationals vs. San Diego Padres (Time TBD)

Magic of Mount Vernon

Sunday, May 28
8:30 AM – 12:30 PM

Price per person: \$75

George Washington wrote of his beloved Mount Vernon, "No estate is more pleasantly situated than this." Today guests will enjoy the same breathtaking view across the Potomac River that enamored President Washington all those years ago.

The buildings and beautiful grounds, part of one of the nation's oldest historic preservation projects, are as meticulously preserved as they were in 1799. These historic grounds reveal Washington's skill as one of the foremost agriculturists of his day, his discerning taste in his home and its furnishings, and his love of the outdoors.

On this special tour guests can pay respects at the tomb of George and Martha Washington, and see the innovative Pioneer Farmer site (a working 4-acre farm and re-creation of Washington's 16 treading sided barn). Visit the inspirational Slave Memorial, interesting outbuildings of the mansion, and the lush gardens and panoramic views. See the \$110 million Ford Orientation Center and Donald W. Reynolds Museum and Education Center, heralded as one of the most comprehensive and spectacular facilities in the nation.

Registration Information

Please review the following information to avoid delays in the processing of your registration or housing request.

Who Needs to Register

Anyone (member or non-member dentist, dentists' staff or dental student) who wants to attend any portion of the Scientific Program must register. All registration categories for AAPD 2017 include all education sessions (except those specified), the Welcome Reception, complimentary beverages in exhibit hall and the Scientific Proceedings. The guest registration is additional and must accompany that of an attendee; children are complimentary to the meeting, but tickets must be purchased for Social Events. Guests do NOT earn any continuing education credit; if seeking CE Credits, spouses/guests must register as Office Staff.

- Tickets to the Presidents' Farewell Dinner are an additional fee and must be purchased separately; see the Social Events section of the registration form and make the appropriate notation.
- Additional tickets to all Social Events must be purchased during registration; onsite tickets for these functions may be limited and are subject to availability.

The cutoff for the advance fee is Monday, April 3, 2017. All registration forms submitted must be postmarked or date stamped on or before Monday, April 3, 2017, to qualify for advance registrations and receive the discounted rates.

Note: To receive the member registration rate for the 2016 Annual Session, your 2016-17 membership dues must be paid in full.

Residents

- Registration is complimentary if you register on or before April 3, 2017.
- Residents registering after April 3, 2017, or onsite are charged \$150 in registration fees; no exceptions will be made.
- Student registration includes a ticket to the Welcome Reception; please indicate your intent to attend on the registration form.

Residents are encouraged to attend the New Dentist Happy Hour on Friday, May 26. Make the appropriate notation on the form and include payment to attend this fabulous networking event.

Registration Materials: What You Receive Onsite

Again this year, badges will not be mailed. Attendees who register in advance will bring their email confirmation to a Badge Pickup counter at registration to receive their badge(s), ticketed scientific sessions and social event tickets at self-serve kiosks. Upon confirming the details of your registration, you will be directed to a counter to pickup tote bag and Program Book.

Registration Methods

Registrations are processed on a first-come, first-served basis. Complete all sections of the form and include proper payment. Each registrant must complete a separate registration form.

Online: <http://www.aapd.org/annual>

Phone: (800) 974-3084

Fax: (301) 694-5124

Credit card only. Allow five days for processing and receipt of registration confirmation.

NOTE: Please do not mail after faxing.

Mail:

AAPD 2017

5202 Presidents Court, Suite G100

Frederick, MD 21703

Credit card or check (drawn on U.S. bank in U.S. funds) must accompany a completed registration form. No wire transfers or purchase orders will be accepted. Allow 7 – 10 days for processing and receipt of registration confirmation. **Make checks payable to AAPD/Experient.**

Registration Hours

Please pick up your badge and materials at Registration at TBD. Registration is available during the following days/times:

Thursday, May 25 7:30 AM – 5 PM

Friday, May 26 7 AM – 5 PM

Saturday, May 27 8 AM – 5 PM

Sunday, May 28 8 AM – NOON

Registration Instructions

- Type or print all information on the registration form and housing form in black ink (please print legibly). To avoid completing the forms, register online at <http://www.aapd.org/annual> for the meeting and hotel.
- AAPD Registration and Housing Services Center is not responsible for faxes not received due to mechanical failure or circumstances beyond our control.
- Due to the volume of forms received, AAPD Registration cannot confirm receipt of faxed or mailed forms.
- Attendees must be registered for the Annual Session (via form or online) in order to make hotel reservations within the AAPD hotel block using the official AAPD Registration and Housing Form or online.
- Most educational sessions do not require tickets. Seating is on a first-come, first-served basis. Many optional sessions, activities and events require additional fees and must be indicated on the registration form; applicable tickets will be included in your meeting materials.
- The Preconference Course, Breakfast Rounds, PALS, BLS and Evidence-Based Education Workshop require additional fees; please indicate session choice and include fees.
- Registration forms must be submitted **on or before April 3, 2017**, to qualify for the discounted fees. Registrations received after April 3, 2017, will be automatically charged the higher registration fees.

Cancellation and Refund Policy

All cancellations postmarked on or before May 1, 2017, will be refunded less a \$150 processing fee (\$50 for office staff and guests).

All cancellation requests must be made in writing to AAPD Registration and Housing Services for processing on or before May 1, 2017.

No refunds will be given after Monday, May 1, 2017. After this date, any extenuating circumstances must be submitted in writing to the AAPD c/o Vice President of Meetings and Continuing Education Tonya Almond at 211 E. Chicago Avenue, Suite 1600, Chicago, IL 60611. Those refunds approved are processed after the Annual Session.

Refunds are not granted for no-shows.

Registration Confirmation

Every effort is made to provide all advance registrants with a confirmation of their registration. This notice will verify whether we received your registration prior to the deadline, and if the tickets requested will be issued.

Please check your registration and fee calculations carefully to avoid unnecessary delays in processing. If you are using American Express®, MasterCard® or Visa®, provide complete credit card information, including each digit of your credit card number, expiration date, security code number and signature.

Name Badges

Name badges must be worn at all times by all registered attendees, including children, in order to gain access to any portion of the Scientific Program, Welcome Reception, access to the Exhibit Hall, hospitality areas and all social events.

Children's badges are provided without charge up to the age of 20; their names and ages must be listed on the registration form.

Questions

If you have any questions regarding registration or housing, contact AAPD Registration and Housing Service Center at (800) 974-3084 Toll-free U.S. and Canada (Monday – Friday, 9 a.m. to 8 p.m. EST), (847) 996-5876 International (Monday – Friday, 9 a.m. to 8 p.m. EST), or aapd@experient-inc.com.

Housing Information

Please read this information carefully. You must register for the Annual Session prior to booking your hotel reservation. All housing reservations must be made through the AAPD Registration and Housing Service Center. Only one reservation allowed per form.

Housing Reservation Methods

Online: <http://www.aapd.org/annual>

Fax: (301) 694-5124

Credit card only. Allow 7-10 days for processing and receipt of registration confirmation.

NOTE: Please do not mail after faxing.

Mail:

**AAPD 2017 Annual Session
5202 Presidents Court, Suite G100
Frederick, MD 21703**

Credit card or check (drawn on U.S. bank in U.S. funds) must accompany a completed registration form. No wire transfers or purchase orders will be accepted. Allow 7 – 10 days for processing and receipt of registration confirmation.

Reservation Deadline

All housing requests must be submitted by Wednesday, April 26, 2017, by 5 p.m. PST in order to receive the AAPD discounted room rate. After April 26, 2017, rooms and rates are subject to availability.

Housing Information and Change/Cancellation Policies

- Reservations are processed on a first-come, first-served basis.
- All reservations require a one night's room and tax guarantee. The hotel deposit may be paid with a check drawn on U.S. banks submitted with a form (mailed forms only). **Checks should be made payable to Experient, not AAPD.** Checks for hotel deposits should NOT include registration fees. This deposit will be credited to your first night stay.
- Acknowledgement of reservation request is sent after each reservation form is processed, as well as each time a reservation is modified/changed and or cancelled. For online reservation housing, acknowledgement is immediate. For fax/mailed forms, acknowledgement will be sent within two business days of completion of processing. Please review acknowledgements carefully for accuracy. If you do not receive an acknowledgement within 14 days of submission, please call AAPD Registration and Housing Services Center at (800) 974-3084.

- All hotel room rates are subject to applicable state and local taxes in effect at the time of check-in (currently 10 percent).
- AAPD discounted room rates are applicable May 22 – May 29, 2017, subject to availability.
- Changes must be made on or before May 9, 2017, at 5 p.m. (PST) and online by accessing your registration/housing record or in writing via e-mail to aapd@experient-inc.com.
- **All cancellations must be received a minimum of 72 hours prior to arrival in order to receive a refund of your deposit.** No refunds will be given for cancellations within 72 hours of arrival or for no shows.
- A portion of the room rate is used to offset the expense of registration and housing services.

COMPREHENSIVE REVIEW OF PEDIATRIC DENTISTRY

JAN. 27-29, 2017 | NASHVILLE, TENN.

register now

Early rate ends Dec. 27

CE credits: 22 hrs

COURSE DESCRIPTION

Taught by expert clinicians, the Comprehensive Review Course will provide attendees an extensive review of pediatric dentistry. The topics discussed in this course include growth and development, assessment and prevention, oral pathology, care for special needs patients, restorative dentistry and materials, trauma, behavior management and pulp therapy. This course is an in-depth summary for all pediatric dentists.

WHO SHOULD ATTEND

All AAPD members, whether you are preparing for the ABPD examinations or just need a refresher.

LOCATION

MANAGEMENT OF PEDIATRIC SEDATION EMERGENCIES: A SIMULATION COURSE

FEB. 11 OR FEB. 12, 2017 | TAMPA, FLA.

register now

Early rate ends Jan. 11

CE credits: 9* hrs

COURSE DESCRIPTION

This course is designed to simulate emergencies that may occur in a pediatric dental office. It will offer some didactic materials but will focus on team-driven assessment and responsiveness to situations that might arise during sedation of children for operative care. The course is intended for pediatric dentists who are currently using sedation techniques in their office and will allow for the participant to make quick assessments of patient status and simulate airway techniques, while managing real-time trending of physiological status with the goal of stabilizing the patient.

* Two (2) hours required online learning in advance and seven (7) hours hands-on.

WHO SHOULD ATTEND

Pediatric dentists who wish to sharpen and practice their cognitive skills and rescue techniques involving emergent pediatric sedation scenarios using SimMan technology.

LOCATION

CAMLS: Center for Advanced Medical Learning and Simulation

COURSE CHAIR & SPEAKER

Stephen Wilson, D.M.D., M.A., Ph.D.

SAFE AND EFFECTIVE SEDATION FOR THE PEDIATRIC DENTAL PATIENT

FEB. 9-11, 2017 | TAMPA, FLA.

register now

Early rate ends Jan. 9

CE credits: 22 hrs

COURSE DESCRIPTION

This course features the recognized leaders in the field, both in dental anesthesia as well as pediatric dentistry. You will find didactic lectures, case studies, film clip sessions, panel discussions and hands-on breakouts with personalized attention. There will be dedicated forums to ask questions and talk about specific issues with course faculty, discuss techniques for effective communication with the patient and parent to address unusually challenging and complex situations. This course will offer opportunities to gain hands-on experience in a personalized setting with real equipment and monitors.

WHO SHOULD ATTEND

Any dentist who sedates children in their office.

LOCATION

InterContinental Hotel

4860 West Kennedy Blvd.
Tampa, FL 33609

PEDIATRIC MEDICINE UPDATE

MARCH 24-25, 2017 | BOSTON, MASS.

register now

Early rate ends Feb. 24

CE credits: 15 hrs

COURSE DESCRIPTION

This course will provide the pediatric dentist, dental resident, hygienist and assistant an update on a wide variety of areas of pediatric medicine. Each lecture will provide a medical review of the more common disorders and diseases that may be encountered in a pediatric clinical practice setting, followed by a discussion of the latest advances in management. For some of the topics there will be a specific emphasis on dental management.

WHO SHOULD ATTEND

All members of the dental team who treat pediatric patients.

LOCATION

Westin Boston Waterfront

425 Summer St.

Dental Home Day Turns Five

Time sure flies. While that's hardly an observation for the ages, it certainly applies to Dental Home Day. The 2017 Dental Home Day will be at Children's National Health System on Wednesday, May 24, during AAPD 2017 in Washington, D.C.

It will be our fifth annual Dental Home Day, which has been sponsored each year by Sunstar Americas, Inc. The event is designed to give back to the AAPD Annual Session host community by providing care for up to 100 children, providing participant children with ongoing care for the following year, and raising awareness of the importance of child oral health.

Every Dental Home Day has been different.

- **AAPD 2013, Orlando**—Our host clinic, Orange Blossom Family Health Center, made our first Dental Home Day a huge success, with more than 90 children receiving care that day. More than 50 AAPD volunteers participated.
- **AAPD 2014, Boston**—Tufts University School of Dental Medicine played host to our second Dental Home Day. More than 50 volunteers, dental students and pediatric dental residents saw nearly 80 children that day.
- **AAPD 2015, Seattle**—The Center for Pediatric Dentistry at the University of Washington cranked up our third Dental Home Day, with 40 volunteers, dental students and pediatric dental residents seeing 156 children (only four missed appointments). The Center also saw every wait-listed child following the event.
- **AAPD 2016, San Antonio**—The School of Dentistry at the University of Texas Health Science Center San Antonio upped the Dental Home Day stakes, holding the event in two locations: their new dental school clinic and their community-based clinic. Between both locations, UTHSCSA saw more than 200 patients!
- **AAPD 2017, Washington, D.C.**—We're anticipating the 2017 event will care for 100 patients – the majority of whom will be special needs or medically-compromised children. It will be our first Dental Home Day held in a children's hospital.

Thanks to the generosity of Sunstar Americas, Inc., volunteers, and host clinic personnel, more than 500 children since 2013 have received care because of Dental Home Day. And 100 more will receive care on May 24.

There are many intervention events held around the country. They usually cover a day or so and they're over. Yes, these events can provide interim relief for children in need, but where do these children go after the last patient has been seen and the event pulls up stakes? Yes, some care is better than no care, but that's why Dental Home Day is a day of service and a year of care. We hope it's the beginning of a lasting patient/parent-dentist relationship.

Dental Home Day is the embodiment of our entire approach to grantmaking. We do our best to ensure every dollar we grant supports activities that are designed to keep children in care throughout the year.

We can't do any of this without your support. Thanks to you, HSHC grantees give kids smiles every day!

Healthy Smiles, Healthy Children Gala

Join us on May 27, from 7 – 10 p.m. at the Italian Embassy in Washington, D.C., for a celebration of our accomplishments and bid on exciting prizes!

Explore history of the Embassy of Italy, its vast atrium, covered by a glass dome, and the design of Architect Piero Sartogo. Sartogo took inspiration from the urban framework of Washington at the end of the eighteenth century by Architect Pierre Charles l'Enfant. Embark on an exhibition of Italian interior design from the last 40 years inspired by Carlo Scarpa, Achille Castiglione, Renzo Piano, Luciano Baldassarre, Ettore Sottsass and many others. Admire modern and traditional Italian artistry with archeological artifacts of the Greco-Roman era and discover Italian paintings from the 17th and 18th centuries.

HSHC Donors at the Leader's Circle level and above will receive two complimentary tickets. Invitations and tickets will be mailed in early Spring 2017. Limited tickets are available for purchase at \$625 per person.

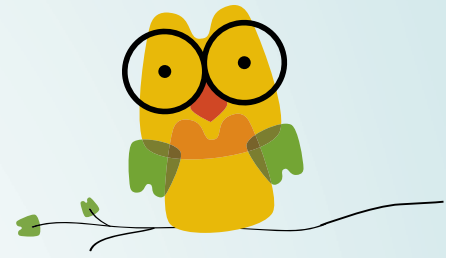

For information or to purchase tickets, contact Michelle Hidalgo at (312) 337-2169 or mhidalgo@aapd.org.

DENTIST

FOR ALL THE REASONS YOU CHOSE PEDIATRIC DENTISTRY, CHOOSE US.

MY DEFINING MOMENT:

“When I was little, I was an anxious patient. Every time I saw my dentist, he would greet me with a big smile and try to make me laugh. I don’t remember all the details of the office or the visits, but what I do remember is that he was a happy person and my experience at the dentist was positive. That’s why my goal as a pediatric dentist is to give my patients a positive experience.

The administrative support I receive from PDS allows me to do that. I feel secure with my role as a clinician because I have the support of a team that expands beyond my office walls. Plus, it’s very rewarding when my patients that relocate tell me they looked for a My Kid’s Dentist® in their new neighborhood. ”

Dr. Kelly Kim

Supported Pediatric Owner Dentist
Murrieta, California

After Dental School

Before Dental School

FOCUS MORE ON YOUR PATIENTS.

WORRY LESS ABOUT YOUR PRACTICE.

As a pediatric dentist at a My Kid’s Dentist® or Every Kid’s Dentist® office, you get the freedom to focus on your clinical and personal passions, the opportunity to work closely with other pediatric dentists who share those same passions, and the ability to attract an ample flow of patients. The result? All the reasons you chose pediatric dentistry – all here in one place.

Student loan refinancing for AAPD members

SoFi saves dentist borrowers an average of
\$870 a month¹

Apply through [SoFi.com/AAPD](https://sofi.com/AAPD) to get a **\$400 welcome bonus²** when you refinance your student loans.

Terms and Conditions Apply. SOFI RESERVES THE RIGHT TO MODIFY OR DISCONTINUE PRODUCTS AND BENEFITS AT ANY TIME WITHOUT NOTICE. See sofi.com/legal for a complete list of terms and conditions. SoFi loans are originated by SoFi Lending Corp (dba SoFi) California Finance Lender #6054612. NMLS #1121636. ¹Monthly savings calculation is based on all SoFi members with a dental school degree who refinanced their student loans between 7/1/15 and 6/30/16. The calculation is derived by averaging the monthly savings of SoFi members with a dental school degree, which is calculated by taking the monthly student loan payments prior to refinancing minus the monthly student loan payments after refinancing with SoFi. SoFi's monthly savings methodology for student loan refinancing assumes 1) members' interest rates do not change over time (projections for variable rates are static at the time of the refinancing and do not reflect actual movement of rates in the future) 2) members make all payments on time. SoFi's monthly savings methodology for student loan refinancing excludes refinancings in which 1) members elect a SoFi loan with a shorter term than their prior student loan term(s) 2) the term length of the SoFi member's prior student loan(s) was shorter than 5 years or longer than 25 years 3) the SoFi member did not provide correct or complete information regarding his or her outstanding balance, loan type, APR, or current monthly payment. SoFi excludes the above refinancings in an effort to maximize transparency on how we calculate our monthly savings amount and to minimize the risk of member data error skewing the monthly savings amount. ²Payment will be issued electronically once you become a SoFi borrower; you have submitted a completed application with documents and your loan has been disbursed. Offer good for new customers only.

The Two BIGGEST Problems Facing Pediatric Dentists

By Rhea Haugseth, D.M.D.

My name is Dr. Rhea Haugseth, and like you, I am a practicing pediatric dentist in Marietta, Georgia. Over the years, I found myself feeling very frustrated with the lack of efficient, cost-effective training available for pediatric dental assistants. In fact, there were two major problems that I continually had to deal with when hiring a dental assistant for my pediatric practice:

1. **They had no clinical training.** Even if they had dental assistants' training, they still fell short of the unique needs of a pediatric practice.
2. **They had no communication skills.** They often did not know how to talk or act professionally or how to communicate effectively with children and their parents. Newly hired dental assistants tend to be young people who are just starting their careers. For a variety of reasons, many of them had very little people skills and life skills such as how to manage their resources or prioritize efficiently.

There was plenty of training for general dental assistants, but nothing for the pediatric field. I knew what it took to create a spectacular PDA, but frankly, I was tired of training and re-training with every new PDA.

Dealing With Problem #1

Knowing that my colleagues were also frustrated with these same challenges, I formally created the Pediatric Dental Assistant School (PDAS) in Atlanta where newly hired PDAs in Atlanta-based pediatric dental offices or those seeking a career as a pediatric dental assistant could get the training they need (for an entry-level position) in 9 weeks of training at my office in Atlanta.

Dealing With Problem #2

Although the PDA graduates were trained clinically, I realized there were other issues I needed to address; namely, teaching them the soft skills that came with working closely with children, parents, and the office staff. So I created training modules on parent/patient communication that teaches PDAs the art of effective communication in a professional setting, and specifically how to communicate and connect with children and their parents. This training can make a remarkable impact in patient/staff relationships.

I realized that the need for specialized training was universal, and pediatric dentists across the nation had to deal with these two problems regularly. "How can I help them?" I wondered. That is when I launched the Pediatric Dental Assistants Association. It not only provides the instruction and resources needed to train newly hired PDAs to quickly become a valuable and fully-functioning member of the staff, it is also a place where high-performing PDAs have been able to grow in their skills and in their careers.

The development of the Pediatric Dental Assistant School, along with the Pediatric Dental Assistant Association has been a wonderful addition to my practice. My staff truly loves these programs!

Pediatric dental offices who would like to receive more training and mentorship for their pediatric dental assistants should enroll their assistants in the PDAA.

For further information, please contact the Pediatric Dental Assistants Association at 770-823-3534 or email pdadirector@gmail.com.

How Would You Like To Have The Best, The Happiest, And The Most Competent Pediatric Dental Assistants Who Actually Make You Money?

The Pediatric Dental Assistants Association is proud to accept memberships from qualifying pediatric dental offices. Take a look at everything that is included in your exclusive membership:

- The Annual PDAA Conference* - an excellent place to keep your PDAs connected and excited to be part of bigger community of high-performing PDAs.
**Additional fee*
- Pediatric dental assistant video training modules in key practice areas.
- Email support from Dr. Haugseth personally.
- 24/7 access to videos and training modules to allow learning during downtime at the office, at the house, or even from a tablet.
- Opportunity to request new training modules to be developed.
- A bi-monthly newsletter filled with fun, helpful news and information.

A PDAA membership is a truly hands-off program for you as the owner/doctor. Your dental assistants will gain valuable knowledge and training that will increase their abilities and help grow and develop your practice. Teaching new skills and sharpening the skills of your existing assistants is the key to keeping your practice happy, productive, and profitable.

Maximize your PDA's value to your practice! Call (770) 823-3534 or visit PediatricDentalAssistantsAssociation.org to join today!

SEEKING PEDIATRIC DENTISTS

CALIFORNIA—SACRAMENTO. Pediatric Dentist needed in a busy Pediatric Dentistry Practice. Very busy office. State of the art. Great reputation. Must be great with children and have good people skills. Board certified or Board eligible would be great. Partnership for the right person. Please send your C.V. and any questions you may have to kathleenrebhan@comcast.net.

COLORADO—LONGMONT. Our well established pediatric dental practice is looking for a very special doctor to join our group. We have offices in two very lovely cities in Colorado, and we are looking for that PERFECT fit in a third partner. This is an amazing opportunity. D.D.S./D.M.D. from an accredited dental school and pediatric specialty degree or certificate from an accredited program. Experience in all phases of pediatric dentistry, especially hospital dentistry and orthodontics. For more information please contact lobopediatrics@gmail.com.

ILLINOIS—WESTERN SUBURBS OF CHICAGO. St. Charles and Oak Brook Office Locations. Outstanding associate opportunity for full time pediatric dentist with intent to pursue ownership within 1-2 years. Both OB and St. C can be purchased together, or St. C can be purchased separately. Owner seeks to phase out and retire within this timeframe and will stay on for mutually agreeable period to facilitate and assure smooth transition. Not in search of an associate without interest to purchase a busy, established and still growing practice. St. Charles office is 2500 sq ft, 5 operatories, available for purchase alone, or with Flagship office in Oak Brook, 2850 sq ft, 9 operatories (6 open bay, 3 semiprivate). Complete office renovation done in 2011. Diverse patient population that seeks optimal care and full range of services including oral sedation, hospital and surgical center care, interceptive and comprehensive orthodontics, and special patient care. Great opportunity for young or experienced practitioner to upgrade, and enhance sedation and orthodontic skills with the desire to add or expand these dimensions to their practice. St. Charles office carries option to purchase space if so desired. Great place to live and raise a family, outstanding schools, world-class shopping and restaurants, close to what a vibrant city offers. Send resume and cover letter of interest and goals to jjpcenterprises@gmail.com.

FLORIDA—LAKELAND. Excellent opportunity for a passionate, ethical and fun-loving pediatric dentist looking for an associate position leading to partnership. Our well respected private pediatric dental practice has been established for 25 years. We are located in a beautiful spacious state-of-the-art building. Our experienced, team oriented staff is devoted to providing high quality preventive care. Our practice is high energy with a great reputation for providing excellent care and patient service. Associate must have excellent interpersonal and social skills and be licensed or qualified to obtain a license in Florida. We have an onsite pediatric anesthesiologist for I.V. sedations. Our practice has a highly desirable suburban location in a very close proximity to the Orlando and Tampa. We offer a competitive compensation and benefit package. You may visit our website at www.dentistry-pediatric.com to learn about our practice. If you are interested in this wonderful opportunity and being a part of our outstanding team providing quality care you may email your resume to dry@dryasrebi.com or call (813) 600-8032.

NEBRASKA—SCOTTSBLUFF. Exciting opening for the right person to work in a brand new, state-of-the-art facility. We are in the process of building a brand new, 4500 square foot pediatric dental office in Scottsbluff, NE. Western Nebraska is a great place to live, work and raise a family. There are great lakes in the area for fishing and water-sports and also close proximity to the front range of Colorado and the Black Hills of South Dakota. We are seeking a passionate, ethical, motivated and fun-loving pediatric dentist to join our growing practice. We strive to treat each child as we would our own and seek someone with similar value system. Doctor will have full autonomy as well as resources to do in-office sedation and the opportunity to do cases in the surgery center. This is an exciting time for us and we are looking for the right person to join our team and grow with us. If you are interested please email your C.V. and photo and cover letter describing why you think you are the best fit for our team. We look forward to meeting you! Position open to new grads as well as experienced practitioners. For more information, contact: luuuke@gmail.com.

NEW YORK—MASSAPEQUA. Amazing opportunity for a pediatric dental specialist who is willing to work full time for a well-established, busy and still growing practice on Long Island. Any candidate for this job should be caring, compassionate, and open to learning, as our team of doctors and staff thrives when working as one unit. The candidate should also be highly motivated and prepared to produce in a state-of-the-art, 10-chair facility. This position includes in-office general anesthesia cases and Saturday workdays. The position begins on April 1, 2017. Send C.V. to Dr. Chillemi at drtchillemi@gmail.com. NYS Dental License.

NORTH CAROLINA—WINSTON-SALEM. Excellent opportunity for a skilled, motivated, dedicated pediatric dentist in a state-of-the-art pediatric dental practice. We are a thriving, well respected, fee for service high quality pediatric dentistry practice located in a Medical Park in the Piedmont Triad of North Carolina. We have an exceptional, experienced, multi skilled team to support patient care in our 15 chair child friendly office, we provide the highest quality care in a fun, caring environment. The practice has a rich benefit package and is offering a sign on bonus. Please send C.V. to: 185 Kimel Park Drive, Suite 202 Winston-Salem, North Carolina 27103, Attention Office Manager.

RHODE ISLAND. Immediate associate position in a reputable pediatric dental practice in beautiful, historic Newport, Rhode Island seeking a confident, motivated, highly skilled pediatric dentist. Effective communication skills, friendly disposition and understanding of quality of care is of primary importance in this practice that serves a small and tight-knit community. Opportunity for operating room privileges in a local hospital. Competitive compensation package available. Please email C.V.: staff@drennonmd.com.

SOUTH CAROLINA—COLUMBIA & SUMTER. Excellent opportunity for pediatric dentist starting IMMEDIATELY!! Patients abound for a dentist who wants to work hard and enjoy Southern living in a private practice setting. We have been in practice for over 33 years in two locations, Columbia and Sumter, both seeking full-time pediatric dentists who are passionate about their careers. Great relationships with all pediatricians in area. Digital radiographs in both offices. Two major hospitals and one surgical center for hospital OR cases between the two offices, and oral conscious sedation performed both locations. Full time position. Continuing Education stipend, health insurance, \$1000/day or 35% collections, whichever is higher, 401K, and relocation expenses provided. The Midlands of South Carolina provide quick access to the mountains and all the beaches of South Carolina, while welcoming you home like no other place. Our teams are extremely loyal and dedicated to providing the absolute best in treatment and comfort for each patient. For more information send C.V. to goinsandpoag@ccdsmail.com. Visit our website at www.carolinachildrendentistry.com.

VIRGINIA. Fun-loving pediatric dental group in the Washington, DC metro area is seeking an energetic and positive full-time pediatric dentist to help us fill our needs with our growing number of pediatric patients. Our state-of-the-art office is well established and an active part of our community. Our wonderful and supportive team members care about our patients and strive to provide the best patient care! We provide a fun and friendly atmosphere! We are seeking a highly motivated pediatric dentist with excellent communication skills to join our dental team. If this is you, please submit your resume and tell us a little bit about yourself! For more information, contact: falinedavenport@me.com.

FACULTY POSITIONS AVAILABLE

MISSOURI—ST. LOUIS. Saint Louis University, a Catholic, Jesuit institution dedicated to student learning, research, health care, and service, is seeking applications from persons interested in a full-time faculty position as the Associate Director of Pediatric Dentistry at The Center for Advanced Dental Education beginning in 2017. The Center is opening a new pediatric dentistry residency program with SSM Health Cardinal Glennon Children's Hospital in July 2017. Responsibilities will include clinical and didactic teaching in the pediatric dentistry graduate program and the mentoring of resident research projects. Salary and academic rank will be based on background, experience, goals of the person hired, and needs of the program. Minimally, applicants must have a dental degree and a certificate in pediatric dentistry from a CODA accredited program. Experience in teaching and research is highly desirable. All applications must be made online at <https://jobs.slu.edu>; applications must include a cover letter and curriculum vita. In addition, three letters of recommendation must be sent by mail to Dr. Daniel C. Stoeckel, Program Director, Graduate Pediatric Dentistry, Saint Louis University, Center for Advanced Dental Education, 3320 Rutger Street, St. Louis, Missouri 63104. Consideration of applicants will begin immediately and continue until the position is filled. Saint Louis University is an Equal Employment Opportunity/Affirmative Action Employer; women and minorities are encouraged to apply.

NORTH CAROLINA—GREENVILLE. Vacancy #: 002538. Salary Range: Commensurate with qualifications. Closing Date: Open until filled. A pediatric dentist is a faculty member who serves in and supports the Division of Pediatric Dentistry, in the Department of Pediatric Dentistry and Orthodontics. The Division of Pediatric Dentistry is responsible for the education of dental students, pediatric dental residents and other residents in the area of pediatric dentistry. The pediatric dentist reports to the Division Chief, Pediatric Dentistry for issues concerning pre-doctoral education and to the

Director, Pediatric Dental Residency Program for issues related to post-doctoral education. Specific duties include: Supporting the didactic and clinical activities within the Division of Pediatric Dentistry; conducting scholarly activities; working with division, department and school faculty to develop and deliver state of the art continuing education programs in the area of pediatric dentistry on a regional, statewide and national basis; actively participating in the school's faculty practice plan; assisting in accreditation activities for the program, department and school; assisting in division quality assurance and improvement and compliance efforts; serving on committees and boards for state/federal government agencies, professional societies and within the school; responding to assignments from Chair of the Department of Pediatric Dentistry and Orthodontics, Division Director, Pediatric Dentistry and Director, Pediatric Dentistry Residency Program essential to division and school operations; performing other duties and assuming additional responsibilities as assigned by the Department Chair and the Dean. Fixed term or tenure track position available at the title/rank of Assistant Professor or higher. Minimum Qualifications: D.D.S. or D.M.D. from an ADA-accredited dental school or foreign equivalent; Certificate in Pediatric Dentistry from an ADA Commission on Dental Accreditation accredited advanced education program in Pediatric Dentistry; Eligibility for dental licensure in North Carolina (a NC dental license must be secured by the time of employment); Knowledge of issues in dental accreditation. Preferred Education and Experience: Commitment to evidence-based teaching and practice; Experience with pediatric dental resident education; Experience with advanced forms of pediatric sedation; PALS certification; Experience with digital record keeping, imaging, and/or grading. Special Instructions to Applicants: East Carolina University requires applicants to submit a candidate profile online in order to be considered for the position. In addition to submitting a candidate profile online, please submit online the required applicant documents: Curriculum Vitae; Letter of interest; List of three references (noting contact information). Additional Instructions to Applicants: Applicants must complete a candidate profile or staff application (see "Application Types Accepted" below)

online via the PeopleAdmin system. In addition, applicants must submit the documents requested in order to be considered for the position. Application Types Accepted: Candidate Profile (EHRA only). Applications will be considered until position is filled. Please submit an online ECU application for vacancy # 002538 to ECU Human Resources at www.jobs.ecu.edu. East Carolina University is an Equal Opportunity/Affirmative Action Employer. Visit this job posting at <https://ecu.peopleadmin.com/applicants/Central?quickFind=83956>.

Stay N Place® Booster Seat

The Booster Seat Saves Your Back and Provides Comfort for Young Patients.

The Stay N Place Booster Seat raises him up 5 inches, so you can do your job effectively.

New Streamlined Design!!

Do you find yourself “scouting” patients to the top of the chair for treatment, only to have them slide back down when the chair is brought upright? Daily repetition of that scenario wreaks havoc on your back and causes lost time for the practice.

The Stay N Place® Booster Seat positions your patient 5” higher, providing better access and increasing efficiency. This simple addition to the dental chair is more ergonomically correct for you and more comfortable for the patient.

The Stay N Place Booster Seat is available in dark teal or cream vinyl, and can be cleaned using a cold disinfectant spray or wipe.
